6.5 Step by Step 3 – Rename view	
7.2 Step by Step 1 – Fill Out an Event - Mobile	

EXERCISES

INEIGHT COMPLIANCE OVERVIEW

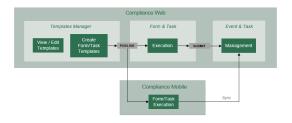

1.1 COMPLIANCE OVERVIEW

InEight Compliance is an electronic system for managing forms and tasks that allow you to capture data within your organization, send out notifications and use the information in all types of reports and dashboards. This includes:

- Creating and storing form and task templates in the Template manager
- · Selecting, filling out, and submitting events and tasks
- Tracking the status of and managing data on the Events and Tasks pages

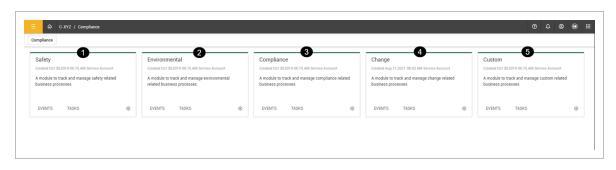

1.1.1 InEight Compliance workflow

From within each of these modules, there is a workflow for creating templates, executing events and tasks, and managing them. The following diagram illustrates how forms and tasks are managed within the InEight Compliance application:

1.1.2 Compliance modules

Compliance is organized into the following modules by default.

Section	Module Name	Description
1	Safety	Module within Compliance that contains standard templates for construction safety processes as well as ability to customize any other templates.
2	Environmental	Module within Compliance that contains standard templates for construction environmental processes as well as ability to customize any other templates.
3	Compliance	Module within Compliance that contains standard templates for construction compliance processes as well as ability to customize any other templates.
4	Change	Module to track and manage templates for integration with InEight Change.
5	Custom	Module to track and manage custom related business processes.

Overview – Compliance Modules

Specific to the module you selected, the Module landing page is the working page where you can view or click on both events and tasks lists or access Administration functions. Depending on your role, you might have the job of creating new events or tasks, which you can also do from the Module landing page, if you have the correct permissions.

1.1.3 Templates manager

Within each Compliance module, you can access the Templates Manager to manage the templates for the module you are in (i.e., the Templates Manager for the Safety module contains safety-related templates).

Within the Templates Manager you can view the templates already created, along with their status (published, draft, or inactive). You can also create new templates using the Form Builder or Task Builder. The creation of form or task templates is an administrative function performed using the web-based Compliance application.

1.1.4 Form & Task execution

1.1.4.1 Mobile application

In the field, users can fill out and submit inspections, forms and questionnaires, and tasks using the Compliance Mobile application. You can complete the relevant event or task offline using the mobile app and synchronize the results when connected to a network. Additional information will be reviewed in 7.2 Filling out an Event or Task - Mobile on page 239.

1.1.4.2 Web forms and tasks

There might be times when a user needs to fill out a form or task via the web application. From one of the modules , you can select and launch the form or task you need using the Forms or Tasks dialog

boxes.

1.1.4.3 Form and task builders

Compliance has both an intuitive Form builder and Task builder that allows the desired level of complexity to be built into your forms/tasks. It yields numerous question types to collect the information you need from the field and provides functional-level permissions with customizable workflows for each form/task.

1.1.5 All Events and All Tasks

Once forms are submitted, you can track forms as events on the Events page of the web-based Compliance application. There is an Events page within each Compliance module, where you can track the status of your event in the approval process (e.g. Pending, With Claims Manager, Complete). Due dates shown in red indicate the event form is overdue.

InEight Inc. | Release 23.10

2.1 COMPLIANCE LAUNCH

To open a project in Compliance, use the link provided to you by your manager or other source.

Click the Main menu icon at the top left, and then select All projects & organizations.

Click the **Name** hyperlink to open the project. You can use the Search function at the top right to find a specific project.

The Compliance landing page opens.

NOTE

In the Projects home landing page you can launch Compliance in other ways not mentioned here.

2.2 COMPLIANCE LANDING PAGE

The Compliance landing page is the home page for Compliance. It is the starting point from which you can access any of the Compliance-related modules to track and manage forms.

The landing page contains the following modules by default:

- Safety
- Environmental
- Compliance

- Change
- Custom

When you click on a tile, it opens to that module's corresponding landing page, where you can access and manage the forms or tasks related to that category.

The modules shown on the Compliance landing page depend on your assigned permissions for the selected project. You can only see the modules you have access to.

2.3 MODULE LANDING PAGE

The Module landing page is the working page where you can look up and fill out forms or tasks related to the module you selected (e.g., Safety, Environmental, etc.). Depending on your role, you may have the job of creating new forms or tasks, which you can also do from the Module landing page, if you have the correct permissions. From the Compliance landing page, assume you select the Safety module tile. This takes you to the Safety Module landing page.

Overview – Module Landing Page

	Title	Description
1	Module navigation	Move from the current module landing page back to the Compliance landing page.
2	Left navigation menu	From this menu you can access all events (filled out forms) or tasks for the module you are in and view their status. If you have Administrator settings, you can perform additional functions by selecting any of the following Administration options:
		 Templates Manager - library of all forms/tasks in your organization, where you can manage blank forms/tasks and build new ones Roles - Manage roles and permissions for Compliance User Assignments - Assign users to organizations/projects,

		Overview – Module Landing Page (continued)
	Title	Description
		 categories and roles Settings - Edit modules, categories, statuses, roles, email templates, and user assignments Create Notifications - Send email to users or roles with a personalized notification
3	To do list	A week's view of your current assigned and pending tasks and scheduled or pending events.
4	Forms or Tasks	To fill out a form/task, select the appropriate category from the Forms or Tasks drop down list, or search for it by its title. You can then select the form or task to fill it out. You can also schedule a form for a specific date by using the button in the top right corner of the Forms box.

0 4 8 🕀 • 1 To do lis FR (Mon 31 Thu 3 Fri 4 Sat 5 Sun 30 Tue 1 Wed 2 8 Tasks Favorites (0) rites (O 0

The following Step by Step walks you through navigation of the Module landing page. It assumes you have privileges to access the Administration settings.

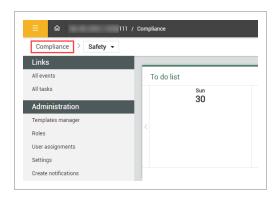

Page 30 of 266

2.3 Step by Step 1 — Navigate Module Landing Page

1. From the Compliance project landing page, select the **Safety** module tile.

2.3.1 To do list

The To do list shows the events and tasks assigned to y ou that need to be completed in the current week.

You can scroll forward or backward to view events and tasks for other weeks. To scroll, click the arrow icons to the left or right of the window. To go to a specific month, click the month button. Events are shown in dark gray, and tasks are light gray. When events or tasks are overdue, their text color changes

to red. You can see how many overdue events and tasks you currently at the bottom right of the To do list.

Ved 24	^{Thu} 25	Fri 26	Sat 27	
Formwork inspection	Batch plant checklist	Concrete pre-placement ch		
Summit Mountain punchlist	Bridge inspection			>
	🔒 Clean drain inlets			
	View all (6)			

You can click **View all** to see a list of all your assigned items for that day when you have several events or tasks assigned in one day.

🗂 June		
Wed 24	^{Thu} 25	Fri 26
Formwork inspection	Batch plant checklist	Concrete pre-placement ch
Summit Mountain punchlist	Bridge inspection	
	🔒 Clean drain inlets	
	View all (5)	
		Overdue events: 0

The following Step by Step walks you through editing a To do list item:

2.3 Step by Step 2 — Edit a To do list Item

- 1. In the To do list, click an event or task.
 - A box shows you the item's name and reporter, a High importance icon to mark items of importance, and the Edit icon
- 2. Click the **Edit** icon.

To do list	Leader Safety Walk Inspections Event title: Leader Safety Walk_2022110700001	ľ		🛱 November
sun	Reporter	1	Tue	Wed
6	Julio Salguero		8	9

- The Edit item dialog box opens
- 3. You can make changes to the following fields, if necessary:
- Event title
- Reporter
- Event date
- Importance

NOTE When the Importance icon is red, the item is High importance, which is also reflected in the Events or Tasks pages.

		Leader Safety Walk		
To do list		Event title: Leader Safety Walk_2022110700001		
	Sun 6	Reporter Julio Salguero Leader Safety Walk_202211070	1 01	Tue 8

Click Save.

2.3.2 Schedule a form

You can schedule a form to be filled out for specific event dates. If the event goes beyond the scheduled date, the event state is changed to overdue.

The following Step by Step walks you through scheduling a form from the module landing page.

2.3 Step by Step 3 — Schedule a Form

- 1. In the Forms box, click **Schedule form** in the top right corner.
 - The Schedule form dialog box opens
- 2. Fill out the required fields.
- 3. You can click the **High importance** icon to flag this event as important.
- 4. You can click **Schedule** to set this event to repeat daily, weekly, monthly, or yearly and fill out the required fields.
- **NOTE** If you select the **Exclude weekends** check box, Saturdays and Sundays are greyed-out and will be excluded, even if you already selected those days.

2.3.3 Form and task favorites

When you open the module, the default view for Forms and Tasks is Favorites. In each category, you can add your favorites by selecting the **Favorite** icon next to each category title. When you add forms to your favorites, they show listed in alphabetical order. To remove from your favorites, deselect the Favorite icon.

Forms	🗎 Schedule form 🛛 Q	Tasks	٩

Claims Assign a Task 1129am	^ ^ ↓	Injuries Corrective Action	
Crane Assign a Task 1129am		Inspections Corrective Action	
	Ψ.		-
	TOTAL: 5		TOTAL: 3

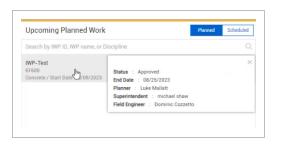

2.4 UPCOMING PLANNED WORK TILE

The IWP widget tile lets you track upcoming planned and scheduled work for InEight Plan IWP components that have been mapped to Inspection and Test Plans. You can schedule events from the IWP widget panel to components that have ITP mapped. For more information, see <u>Inspection and Test Plans</u>. To enable the IWP widget, go to project > Module settings > Project Settings. Inspection & Test Plans and Integrate with Plan components must be enabled before you can enable the IWP widget. For more information, see <u>Project Settings</u>.

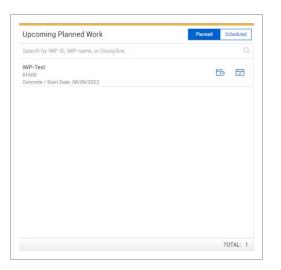

G Steel Structure Training Job | 105 Completions > Quality -Links 🗄 Octobe My To Do List Sun 1 Mon 2 Tue 3 Wed 4 Thu 5 Sat 7 Fri 6 Inspection & Test Plans fue events: 0 Overdue tasks: Forms C Schedule form Q Tasks Upcoming Planned Work Planned Sch Q Favorites (0) • Favorites (0) • to 🖾 / Start Date: 08/28/2023 MS - IWP- Steel Erection Module 001 to 🖽 / Start Date: 08/29/2023 No iteme found No iteme found TOTAL: 0 TOTAL: TOTAL

When enabled, the Upcoming Planned Work tile shows in the module landing page.

Click the IWP to show status, end date, planner, superintendent, and field engineer information.

You can schedule IWP forms from the Planned tab, and then mark them as scheduled to move them to the Scheduled tab.

Items marked as Scheduled are listed in the Scheduled tab. You can schedule additional items from the Scheduled tab if needed, or unschedule the item to move it back to the Planned tab.

Upcoming Planned Work	Planned Scheduled

IWP-Test	
61600	to 🖾
Concrete / Start Date: 08/09/2023	

2.4.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- Components must first be associated to ITPs in InEight Plan
- IWPs must have a status of Approved or Work started.
- You must add your published template form to Required records Compliance Forms in the ITP activity.

2.4.2 Related information

InEight Plan Link activity components in Work Package Creation

2.5 PROJECT STRUCTURE

You can use the project structure hierarchy to view and filter the events performed on a project structure in the Events page. The relationships in the hierarchy list are defined in InEight Platform in Project values and Project Structure definition.

Quality > Events -						Q G	lobal Events/Tas	ks View: M	y view		•
⊞ ⊗ ▼ 👗						🕑 E	lit properti	1	i	۹ 🛛	Clear all filters

▲SEG1			<u>PS - East -</u>		Field Forms	09/07/2023	202309070	STRUCTUR	Steel Struct	Michael Sh	Pending
₩est											
∧SEG2											

When the project structure feature is enabled, you can click the **Project structure** icon on the Events page to view the project structure. Component values are shown in the project structure, based on their configuration defined in InEight Plan. For more information, see InEight Plan <u>Work Package</u> Creation.

2.5.1 Considerations

- It is imperative that the Platform project definition and Plan component configuration match exactly for components to show in the structure. For example, when the project structure definition is Area = North and Segment = 1, the Plan component configuration needs to be the same. If the Plan component configuration has an area = South Area and a segment = Segment 1, the component will not show in the structure.
- Commodity and Work Classification project structure values do not exist on a component and should not be used in the project structure definition.
- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.1 COMPLIANCE SETTINGS AND ADMINISTRATION

3.2 SETTINGS OVERVIEW

Organization and project level settings provide the structure necessary to manage the application successfully.

At the Organization level, you can manage the following:

- Product Settings Module management and template integrations.
- Module settings Manage individual module settings and configurations.

At the Project level, you can do the following:

- View Product, Template integration and Module settings configured at the organization level.
- View and manage Roles, User assignments, and Project settings.

3.2.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform, an admin role in the assigned module or modules, or an assignment to the root organization based on permission configuration.
- There are other ways to navigate to the organization or project level settings not mentioned in this document.

3.2.2 Steps

Access organization level settings

- 1. From the Main menu, go to organization > **Settings**. The organization General Settings page opens.
- 2. Click the **Compliance** or **Completions** icon on the left navigation menu. The settings page opens to the Product Settings tab.
- 3. You can click the **Module Settings** tab to open the module tiles page. Click a module to open its settings.

Access project level settings

- From the project's home page, click Settings on the left navigation menu, and then the Compliance or Completions icon. The settings page opens to the Product Settings tab. In the Product Settings tab, you can view Module management and Template integration settings configured at the organization level.
- 2. Click the **Module Settings** tab to open the module tiles page.
- 3. Click a module to open its settings. The Module settings page opens. You can manage roles, user assignments, and project settings.
- 4. Click the **Project Settings** tab to open the Project Settings page.

3. ORGANIZATION LEVEL SETTINGS

As an administrator, you can set up the correct settings at the organization level to manage and organize the application successfully. These settings will apply to all projects in the organization. You can view organization level settings at the project level, depending on your permissions.

Organization level settings include the following:

- Product settings
 - Module management
 - Template integrations

- Module settings
 - Module summary
 - ° Categories
 - Types
 - ° Classifications
 - Statuses
 - ° Email-templates
 - Roles
 - User-assignments
 - Inspection and Test Plans

3.0.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.0.2 Steps

To navigate to Organization settings, go to steps to access organization level settings in <u>Settings</u> overview.

3. PRODUCT SETTINGS

At the organization level, the Product settings page contains settings that apply to the entire application in the following tabs:

- **Module management** Manage modules for your organization and enable Inspection and Test Plans for individual modules.
- Template integrations Manage templates that integrate with other InEight applications for

your organization.

	Module management Template integration	8			
• (#)					Q
•	Module name	Description	Secondary module name	Inspection and Test Plans(i)	
*	Safety	A module to track and manage safety related business processes.	Safety	\odot	
8	Environmental	A module to track and manage environmental related business processes.	Environmental	Θ	
-	Compliance	A module to track and manage compliance related business processes.	Compliance	\bigcirc	
47	Change	A module to track and manage change related business processes.	Change	\bigcirc	
6	Custom	A module to track and manage custom related business processes.	Custom	Θ	
8 9 8 9					

3.0.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.0.2 Steps

To open Product Settings, see steps to access organization level settings in Settings overview.

3.1 MODULE MANAGEMENT

In Module management you can view the list of available modules. You can filter the module's view using the **Filter** icon. You can also choose from the available columns to update your list view using the **Column chooser** icon.

In each module, you can enable the **Inspection and Test Plans** (ITP) feature. Inspection and Test Plans are disabled by default.

Module management Template integ	ations			
				Q
Module name	Description	Secondary module name	Inspection and Test Plans	α
Safety	A module to track and manage safety related business processes.	Safety	\odot	
Environmental	A module to track and manage environmental related business processes.	Environmental	Θ	
Compliance	A module to track and manage compliance related business processes.	Compliance	\odot	
Change	A module to track and manage change related business processes.	Change	\odot	
Custom	A module to track and manage custom related business processes.	Custom	Θ	

3.1.1 Considerations

- You can only view available default modules.
- You can filter and update views at the organization level only.

3.1.2 Steps

To open Module management, see steps to access organization level settings in <u>Settings overview</u>.

3.1.3 Related information

Inspection & test plans

3.2 TEMPLATE INTEGRATIONS

In Template integrations you can view, edit, and delete the list of templates created in the form builder.

Modu	le management Template integrations				
Q	3				
	Integration title	Template name	Module	Category	Associated products
	Change Task Integration Template	Task for Mobile	Change	Task	Change
	Change Task Integration Template	Change Issue Creation KL NOT INTE	Change	Task	Change
	Quality task for Change	Manager quality review	Quality	Quality review	Change

Click on a template title to Edit the template. In the dialog box, you can edit the following:

- Integration title
- Description
- Category association
- Associated products
- Organization association

k for Mobile odule: Change + Created by: Karen Loftus 08/31/2022 08:50 AM

	C-XYZ-ND (EO-ID) + Future Children	
	Select all Deselect all	
	C - XYZ-SD (EO-ID-1) (+ Future Children) Select all _ Deselect all	
	Select all Deselect all	

3.2.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- Currently template integration only integrates with InEight Change tasks.
- You can only edit and delete integration templates at the organization level.
- You cannot add new integration templates in this section.

3.2.2 Steps

To open Template integrations, see steps to access organization level settings in Settings overview.

Edit a template

- 1. Click the Templates Integration title. The Edit template integration dialog box opens.
- 2. Complete your edits, and then click Save.

3.2.3 Related topics

Template Integration

3.3 MODULE SETTINGS

Configuring module settings at the organization level provides the structure necessary to organize and manage the application successfully. In Module settings, you can configure:

- Module summary
 - ° Configurations
- Categories
- Types
- Classifications
- Statuses
- Email templates
- Roles
- User assignments
- Inspection & Test Plans

In settings, select the Module Settings tab, and then a module to open its settings.

Μ	lodule settings 👌 Safety 👻				
M	odule summary Categories Types Classifications Statuses Email templates Roles User assignments	Inspection & Test Plans		•	Tem
			Cancel		Sa
	Module summary	Configurations			
	Module name	Alternate hierarchy			
	Custom	 Automatic user assignments ① Language settings ① 			
	Description	 Module organization ① Reporting tags ① 			
	A module to track and manage safety related business processes.				
	Email address				
	InEight.Mail@INEIGHT.COM				
	Activate module ?				

3.3.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.3.2 Steps

To access Module settings, see steps to access organizational level settings in Settings overview.

3.4 MODULE SUMMARY

On the module summary tab, you can activate or deactivate the module, view and modify the module name and description, and edit module configurations.

Module summary	Configurations
* Module name	Alternate hierarchy ①
Safety	 Automatic user assignments ① Language settings ①
Description	 Module organization ① Reporting tags ①
A module to track and manage safety related business processes.	
Email address	
InEight.Mail@INEIGHT.COM	

The Activate module toggle can be used to activate or deactivate the module for the entire InEight product portfolio, organization, and project. Each module is self-contained and does not share

information with the other modules. The changes made to a module will be shown throughout the product portfolio, module page, tabs, landing page and mobile device.

3.4.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To activate the module, you must select at least one module organization, a category, and a published template.
- To make the module available, you must select the Activate module toggle.

3.4.2 Steps

To navigate to Module summary, go to steps to access organization level settings in <u>Settings overview</u>.

To save any changes in Module summary, click Save.

3.5 CONFIGURATIONS

On the Module summary tab, you can configure additional settings in Configurations. Each link shows an information dialog box you can hover over for more details.

Module summary	Configurations
Module name	Alternate hierarchy (1)
Safety	 Automatic user assignments ① Language settings ①
Description	 Module organization ① Reporting tags ①
A module to track and manage safety related business processes.	
mail address	
InEight.Mail@INEIGHT.COM	
Activate module ?	

Configuration	Description
Alternate hierarchy	Future children assignments applied to organization level nodes on the default organization or project structure are

Configuration	Description
	applied to the child project per their additional relationship.
Automatic user assignments	Automatically add users from InEight Platform into Compliance/Completions.
Language settings	Select which languages you want to use in this module.
Module organization	Include or exclude organizations or project in the structure from seeing the current module.
Reporting tags	Secure information displayed in reports.

3.5.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- Configuration settings must be done at the organization level.

3.5.2 Steps

To go to Configurations, see steps to access organization level settings in <u>Settings overview</u>.

3.6 ALTERNATE HIERARCHY

An alternate hierarchy is separate from the default organization and project hierarchy in InEight Platform. You can set up an alternate hierarchy when you need to share templates and user permissions across projects that do not follow the default hierarchy. For example, if your default hierarchy is organized into legal entities for financial reporting purposes, you can create an alternate hierarchy based on project locations. A project in the infrastructure division might need to share templates and user permissions with a project in the Energy division because both are in the Western region.

To set up an alternate hierarchy, you must perform the following steps:

- 1. Define hierarchy attributes in Platform.
- 2. Associate hierarchy attributes at the project level with other projects or organizations.
- 3. Extend templates and user permissions between future child projects or organizations via hierarchy attributes in Completions organization settings.

3.6.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.6.2 Steps

To navigate to Alternate hierarchy, see steps to access organization level settings in <u>Settings overview</u>.

Define alternate hierarchy attributes at the organization level in Platform.

- 1. From the Main menu, go to organization > **Settings**. The organization's Home Page opens.
- 2. Click the **General** icon on the left navigation menu, and then click the **Attribute Definitions** tab.
- 3. Click the Add icon. The Add attribute side panel opens.
- 4. Enter the required fields.
- **NOTE** For hierarchy purposes, the Data type field is most often set to text or data. When the type is set to Data, you must select a data source.
- **NOTE** In a location-based hierarchy example, an attribute might be named Region, Data type set to Data, Data source set to Organization, and Category set to Location, which lets you associate organizations with regions.

Associate alternate hierarchy attributes at the project level

- 1. From the Main menu, go to All projects & organizations.
- 2. Select the check box next to the project, and then click the Edit project icon.
- 3. Select the **Attributes** tab. For each attribute you want to associate, select an organization from its drop-down list or enter a project ID in its field, depending on the attribute's data source.
- 4. Click Save.
- **NOTE** In a location-based hierarchy example, you might associate an attribute named Region with an organization that represents the Western region. If you set this association in a project in the infrastructure division of your default hierarchy, you are saying that project is also part of the Western region in an alternate location-based hierarchy.

Apply alternate hierarchy to templates and user permissions

1. On the Module summary tab, click **Alternate hierarchy** under Configurations. The Alternate hierarchy dialog box opens.

Current structure	
Default Organization/Projects structure	
* User permissions to extend to all future children assignments	
	×
* Template associations to extend to all future children assignments	
	×

- 2. Select attributes from the drop-down lists for user permissions and template associations.
 - NOTE User permissions and template associations are applied to all future child organizations or projects of the attributes you select. If you remove the attributes, the associations themselves are not removed.
- NOTE In the example of a location-based hierarchy, if you add the Region attribute to these fields, for projects that are both associated with the Western region, templates and user permissions will be automatically assigned to users in future children of the Western region organization.

3.7 AUTOMATIC USER ASSIGNMENTS

The Automatic user assignments configuration lets you save administrative setup time by automatically assigning a Compliance or Completions role and categories to all InEight Platform users.

Users will need to be assigned a role and a Project assignment in Platform, and then they will automatically get the following from automatic user assignments:

- User assignments for the role and category you provide.
- Assignment into any project they are related to in Platform.

The updates run nightly.

3.7.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

Automatic user assignments will not be assigned when organization level is chosen as the assignment in InEight Platform.

3.7.2 Steps

To navigate to Automatic user assignments, see steps to access organization level settings in <u>Settings</u> <u>overview</u>.

Add automatic user assignments

1. Click **Automatic user assignments** under Configurations. The Automatic user assignments dialog box shows.

omatic user assignment	IS
 Select a role to auto assign us 	sers
L2 user EP	•
* Select a category or categorie	es to auto assign users

assigned the selected Role and	d Category(les) applied above as of U9/U//ZUZ3 Z:UU.

2. Select a role and categories from the drop-down menus, and then click **Save**.

3.8 LANGUAGE SETTINGS

You can select different languages to use in modules. All user-configurable fields can be translated into the languages you select.

After you configure your languages, to translate user-configurable fields, click the **Manage Translations** icon to select a language from the drop-down list.

To apply translations to a template, use the import function in a template's Properties tab. For more information, see Template translation.

3.8.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.8.2 Steps

To navigate to Language settings, see steps to access organization level settings in <u>Settings overview</u>.

Add a language

1. Click Language settings under Configurations. The Language settings dialog box shows.

nguage settings			
* Select which languages you would lik	e to use with this module		
English			×
		_	Cancel Save

- 2. Click in the **Select which languages you would like to use with this module** field to view the language drop-down list, and then select a language or languages.
- 3. Click Save.

3.8.3 Related information

Template Translation

3.9 MODULE ORGANIZATION

The Module organization lets you exclude any organization or project from seeing the current module. By default, all organizations and projects are included. When you exclude organizations or projects, you will not see the current module in those organizations or projects. When you exclude a project, the project cannot be used in user assignments or templates.

You might want to exclude the safety module from your project, if for example, the project is using a different software to keep track of safety data.

3.9.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.9.2 Steps

To navigate to Module organization settings, see steps to access organization level settings in <u>Settings</u> overview.

Exclude projects or organizations

1. Click **Module organization** under Configurations. The Module organization dialog box opens. The hierarchy shown is your organization's operational structure.

NOTE You can expand and collapse organizations to view their projects.

2. Uncheck the organization or project to exclude it from seeing the module, and then click Save.

To select or deselect all projects in the organization click the **Select all** or **Deselect all** buttons. You can also click the **+Future Children** button to automatically include future children projects. When selected, the button will turn green.

To view all excluded organizations or projects, enable the View excluded jobs toggle.

3.10 REPORTING TAGS

Within Compliance or Completions individual modules, you can configure reporting tags to secure information shown in reports. Reporting tags drive permissions when running reports. If a question is assigned a reporting tag and you are not assigned that reporting tag, you cannot see the response to the question in a report. Reporting tags are defined per module.

F	Reporting tags	×
	\odot \otimes	(i) ·
	Reporting tag	
	Claims	
	Confidential	
	Financial	
	HR	
	Injured Party	
	Quality	
	Witness	
		8 reporting tags
		Cancel Save
		Gancer

After you add reporting tags, you can assign reporting tags to users in Module settings > User assignments.

When you build your form, you can define who can see the question reporting data in Template manager > Form builder > **Access** section.

3.10.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.10.2 Steps

To navigate to Reporting tags, see steps to access organization level settings in Settings overview.

Add a reporting tag

- 1. Click the Add tag icon.
- 2. Enter the reporting tag name, and then click **Save**.

Delete a reporting tag

- 1. Select a tag or tags.
- 2. Click the **Delete tag** icon.

3.11 CATEGORIES

You can create and manage categories in your organization to divide your templates into topics that have shared characteristics. Categories are module specific and can be applied as another layer of permissions to drive security within the module.

Each template must be associated with at least one category. You can associate categories to a template in Template Properties > **Category association**. In the Templates manager page, under **Filters**, you can also filter your templates by categories.

In User assignments, you must designate categories as part of the assignment. For more information, see User assignments.

By creating categories, you can partition the module into smaller areas that can help define the module's purpose.

For example, you could break your module down into four different categories, such as:

- Work types
- Disciplines

- Processes
- Subcontractors

Categories can be created for anything you need based on your company's business processes.

	C-XYZ / Settings	0 4 8 🕞
	Addule settings > Quality •	
N	odule summary Categories Types Classifications Statuses Email templates Roles User assignments Inspection & Test Plans	 Templat
		Cancel
	Catagorian

	Category	
	Checklist	<u>^</u>
	Checklist Q	
	Quality I	
	Quality Process	
	Quality review	
	Safety Category 1	
	Safety Category 2	

3.11.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To activate the module, you must add at least one category created, in addition to a published template.
- You cannot delete categories that are designated in user assignments or used in published templates.

3.11.2 Steps

To navigate to Categories, see steps to access organization level settings in <u>Settings overview</u>.

Add a category

- 1. Click the Add category icon.
- 2. Enter the category name, and then click **Save**.

Delete a category

- 1. Select a category or categories.
- 2. Click the **Delete category** icon.

3.12 CLASSIFICATIONS

Classifications are used to further classify forms and associate them to filters and reporting, as well as facilitate logic within a form. You can use classifications on any template in the module.

Module s	ettings 🔌 Quality 👻		_							
Module su	mmary Categories Types	Classifications	Statuses	Email templates	Roles	User assignments	Inspection & Test Plans		(Templat

		* Quality step	

Go to Template creation > Form and Task Builder – Build Tab > **Classifications** section for more information.

3.12.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- You cannot delete classifications used in published templates.

3.12.2 Steps

To navigate to Classifications, see steps to access organization level settings in <u>Settings overview</u>.

Add a category

- 1. Click the Add Classification icon.
- 2. Enter a name, and then click **Save**.

Delete a category

- 1. Select a Classification or Classifications.
- 2. Click the **Delete classification** icon.

3.13 STATUSES

Statuses represent the condition of a form or task. Default statuses of complete, pending, scheduled, and canceled are applied to each module. New sub statuses can be created under Complete, Pending, and Canceled statuses to facilitate your business processes. You can also change or add background and text colors to statuses to customize your view.

N	todule summary	Categories Types Classifications Statuses Email templates Roles User assignments Inspe	ction & Test Plans	🔿 Tem			
	ioudic outilitary		Car				
	Statu	ISES					
	Create any	additional statuses for the module. (j)					
	(+) (×)			1			
		m/User-defined status	Background Text				
	Complet	Complete T

The following table provides more information on the default statuses.

Status	Notes when:	Customizable	Permissions	Can Be Overdue	Editable
Complete	Form or Task is completed, and workflow is done.	Yes	It has permissions tied to it such as when completed form or task locks and cannot be reopened by certain roles.	No	Permission based
Pending	Form or Task is started and is in this status until completed.	Yes	All roles have permission to this status.	Yes	X
Scheduled	An Event or Task has been scheduled.	No	All roles have permission to this status.	Yes	x
Canceled	An Event or Task was	Yes	All roles have permission to this	No	х

Status	Notes when:	Customizable	Permissions	Can Be Overdue	Editable
	started but there is no intent to complete it.		status.		

3.13.0.1 Differences between a state and a status

The state of a form or task is another indication of their condition that is different from a status. Unlinke statuses, states cannot be changed or customized. States are driven actions you take in forms or tasks. For example, they let you know that a work item is overdue regardless of its status in your workflow or process.

The following table provides more information about states:

State	Notes when:	Work item types
In Process	Form or Task is pending.	Forms and tasks.
Complete	Form or Task is complete.	Tasks only.
Overdue	Form or task workflow or due date has passed.	Forms and tasks.
Saved	Task is not yet assigned.	Tasks only.
Scheduled	Form or task has been scheduled.	Forms and tasks.
Canceled	Form or task was started but there is no intent to complete it.	Forms and tasks.

3.13.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- The standard statuses cannot be renamed or deleted.

3.13.2 Steps

To navigate to Statuses, see steps to access organization level settings in Settings overview.

3.14 EMAIL TEMPLATES

You can apply system generated email templates to send to responsible parties when events and tasks are assigned, overdue, or reversed, and to send reminders of upcoming events and tasks before they are due.

	Module summary Categorie	es Types Classifications Sta	atuses Email templates Roles	User assignments Inspection	& Test Plans	 Templates

	Reversed Event Workflow Notifica	Reversed Event Workflow notifica	Ineight Service Account	06/12/2020	08/14/2020	Ineight Service Account			
Ð									

The system-generated emails leverage predefined templates that are configurable by module administrators.

Template	Description
Assigned eventAssigned task	Emails are sent to responsible parties when you assign a task or event.
 Overdue event Overdue Event workflow step Overdue task. 	Emails are sent to responsible parties when their assigned event, task, or workflow step has passed its due date.
 Reminder of upcoming event Reminder of upcoming task 	Emails are sent to responsible parties prior to the event or task due dates.
 Reversed Event Workflow Notification 	Emails are sent to responsible parties when a workflow is reversed back to a step already completed by the responsible party.

You can edit the following items in the email templates:

- Template name.
- The body of the email, including the font.
- Change the email language.
- Add variables so that users can enter information such as reporter names or event titles into emails. To add a variable, type @, and then select an option from the drop-down list.
- Click the **Restore default template** button to restore a template to its original state.

		Tasks - Print Version	_		Add template integration

NOTE The default reminder notification is 7 days, and the maximum number of days allowed is 99. You will not receive a reminder when the number of notification days is past the due date.

3.14.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.14.2 Steps

To navigate to Email templates, see steps to access organization level settings in Settings overview.

3.15 ROLES OVERVIEW

Roles and permissions are maintained in both InEight Platform and the Compliance or Completions applications respectively.

In Compliance or Completions, you can configure roles and permissions in the Roles tab. You can add, copy, delete, and edit roles.

When creating or updating a role, you can configure permissions for the following items:

- Module
- Events
- Roles/Users
- Templates
- Project Settings

The History tab shows in existing roles.

3.15.0.1 Organization and project's home page access to application

The Compliance and Completions icons show in your home's landing page left navigation menu and tiles regardless of permissions.

When you click to open Compliance or Completions and do not have the applicable permissions assigned, a message shows requesting you to coordinate permissions setup with your administrator.

3.15.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.15.2 Steps

To navigate to Roles, see steps to access organization level settings in Settings overview.

3.15.3 Related information

InEight Platform Roles and permissions

3.16 INEIGHT PLATFORM PERMISSIONS

InEight Platform account administrators must have Level 3 – Account Admin permissions and full access to all modules to manage and set up Compliance or Completions roles and permissions. By default, these permissions are assigned to the Account Administrator and Dev/Ops roles. These roles should be assigned with discretion.

In Platform, you can access permissions by navigating to Main menu > Suite administration > Roles and permissions. Permissions for Compliance and Completions are found in the Organization and project drop-down menu.

NOTE

There is no drop-down menu for the Compliance or Completions application in Platform Permissions.

During initial setup, a Platform role lower than level 3 will not have access to Compliance or Completions. Other permissions to access Compliance or Completions outside of the Level 3 role need to be configured and obtained within Compliance or Completions.

Platform level 3 roles are set up to edit all modules. These settings override all other Compliance or Completions level permissions. There are no settings or permissions in Platform that will allow a level lower than a Level 3 to access Compliance or Completions as an administrator.

A level 3 user must be the first user to log into the application to set up users and configure the module or modules or set up a module administrator in the application to perform these tasks. It is common practice for level 3 administrators to set up additional administrative roles in Compliance or Completions.

Role	Definition	Example
Platform account administrators	Level 3 - Account Admin - with edit and view permissions of all modules - Highest level access.	 Account administrator
Compliance or Completions product Administrator	Level 3 - Responsible for creating or modifying the roles for Compliance or Completions Admins within each module.	 Quality Dept Administrator Compliance or Completions Product Administrator

The following table shows examples of InEight Platform's user roles and definitions:

3.16.1 Considerations

- In general, the average Compliance or Completions user does not need Platform permissions to access the product. Users (other than a level 3 user) are maintained directly in Compliance or Completions. A level 3 user assignment overrides all Compliance and Completions-level assignments.
- The level 3 role must be maintained correctly in Platform to add subsequent users in Compliance or Completions.

3.16.2 Related information

InEight Platform Roles and permissions

3.17 ROLES

The setup and design of Compliance and Completions roles and permissions are different than any other of the InEight cloud platform applications. A Level 3 – Account Admin role, with full permissions of all modules must be present and maintained correctly in Platform for subsequent users to get added to the Compliance and Completions application. The level 3 administrator can set up module administrators and configure modules according to business needs.

The image below shows the default seated roles:

	Nodule settings > Quali		Otational Englishment	ates Roles		ments Inspection & Test F) Template
м (+		s Types Classifications	Statuses Email templa	ates Roles	User assigni	nents inspection & rest i	nans (•) remplate
	Name †	Description	Created by	Created on	Ŧ	Last updated on	Last updated by	Ŧ

	Read-only	Read-only - Allows users r	Service Account	11/04/2019		11/04/2019	Service Account	
	Reporter	Reporter - Allows performi	Service Account	11/04/2019		11/04/2019	Service Account	

Name	Definition
Module administrator	Full access to all the permissions.
Reporter	A general role that allows the execution of forms in any category or project assigned. It does not allow manipulation of other users, role creation, or template creation.
Read-only	A general role that allows the viewing of events and tasks in assigned categories or projects. It does not allow manipulation of other users, roles, templates, events, or tasks.

Role permissions are module specific. They are comprised of permissions that you can perform in a specific module. You can create different roles with specific permissions as needed to facilitate any process you plan to do in a module. When you create a new role, it will default to Reporter role permissions. After you create a role, you can update its permissions.

The following table shows examples of user roles and definitions:

Role	Definition	Example names
Module Administrator	Responsible for administering Compliance or Completions daily per the organizational assignments.	Compliance or Completions Module administrator
Other general roles	Specific job roles with limited access.	Form CreatorCrane Manager

NOTE In User assignments, you must designate roles as part of the assignment. The users in the assignment will inherit the permissions in the designated role. For more information, see User assignments.

The roles tab page shows the following role columns:

- Name
- Description
- Created by
- Created on

- Last Updated on
- Last updated by

You can filter the columns and use the Column chooser to customize your view.

3.17.1 Steps

To navigate to Roles, see steps to access organization level settings in Settings overview.

Add a new role

- 1. Click the **Add role** icon. The Add role dialog box opens.
- 2. Fill in the required role name and optional description.
- 3. Select the designated permissions, and then click Save.

Copy or delete a role or roles

- 1. Select the checkbox next to the role or roles.
- 2. Click the **Copy role** icon to copy or the **Delete role** icon to delete.

Edit a role

- 1. Click the role name link. The Edit role dialog box opens.
- 2. Edit the role, and then click Save.

The following table is a summary of permissions in the Templates tab:

Permission	Location	Allowed actions
Create and edit templates	Templates manager forms	Create, edit, copy, deactivate and delete forms.
	Templates manager tasks	 Create, edit, copy, deactivate and delete forms.
	Form builder	 Use all functions including form flows.
	Task builder	Use all functions.
	Compliance/Completions landing page	 View module tiles according to your assignments.
	Module landing page	 View side menu Templates manager link.

3.21.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

The **Make this role read-only** option is available in all tabs, except for the History tab. For more information, see Read only role.

3.21.2 Steps

To navigate to Module permissions, see steps to access organization level settings in Settings overview.

3.22 PROJECT SETTINGS PERMISSIONS

Within Compliance or Completions individual modules, you can configure project settings permissions that can be associated to roles.

To go to Project Settings permissions, go to Module settings > **Roles**. Select **Add role** or click an existing role to edit the role, and then select the **Project Settings** tab.

Name	Description		
MODULE EVENTS ROLES/USERS	TEMPLATES PROJECT SETTINGS		
Enable/ Disable Project Structure	Manage Project Inspection and Test Plans	🗌 Manage Project User Groups	
 Edit header template 	Create and edit Inspection and Test Plans	Create and edit User groups	
	Edit header template		
Manage Automapping			
Setup Automapping criteria			
Perform Automapping			

The following table is a summary of permissions in the Project Settings tab:

Permission	Description				
Enable/ Disable Project Structure (When selected, the Edit header template checkbox is automatically selected)	Enable or disable the ability to manage, add, and edit project structure header templates, and add them to forms, based on user assignments at the project level.				
Edit header template	Enable the ability to edit header templates associated with the project structure process at the project level.				
Manage Project Inspection and Test Plans (When enabled, the Create and edit Inspection and Test Plans and Edit header template checkboxes are automatically selected)	Enable the ability to manage, add, and edit Inspection and Test Plans (ITPs), and edit ITP header templates in Module settings > Inspection and Test Plans tab at the project level. You can access the Inspection and Test plan report in the module landing's page on the left navigation menu.				
Create and edit Inspection and Test Plans	Enable the ability to create and edit Inspection and Test Plans (ITPs) at the project level in the project's Module settings > Project Settings > Inspection and Test Plans section. You can access the Inspection and Test plan report in the module landing's page on the left navigation menu.				
Edit header template	Enable the ability to edit the header template associated with the Inspection and Test Plan process at the project level.				
Manage Project User Groups (When selected, the Create and edit User groups checkbox is automatically selected as well)	Enable or disable the ability to manage, create and edit User Groups at the project level in the project's Module settings > Project Settings > User Groups section.				
Create and edit User groups	Enables the ability to create and edit user groups.				
Manage Automapping - When selected, the Setup Automapping criteria and Perform Automapping checkboxes are automatically	Enable the ability to manage, setup criteria for, and perform automapping at the project level in the project's Module settings > Project Settings > Automapping section.				

Permission	Description
selected as well.	
Setup Automapping criteria	Enables the toggle to manage Setup Automapping criteria in the project's settings.
Perform Automapping	Enable the toggle to allow users with permission to run automapping. The toggle ability is associated with the Manage Automapping option that you can enable at the project level.

3.22.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

The **Make this role read-only** option is available in all tabs, except for the History tab. For more information, see <u>Read only role</u>.

3.22.2 Steps

To navigate to Module permissions, see steps to access organization level settings in Settings overview.

3.23 HISTORY

Within any Compliance or Completions individual modules, you can view the history of any changes performed in a role. To go to the history of a role, go to Module settings > **Roles**. Click an existing role to edit the role, and then select the **History** tab.

The History tab provides a list of changes made to a role. You can also edit the role's **Name** and **Description** fields. As with other InEight features, data in these columns can be filtered or sorted.

Each time a role is updated and saved a new entry is created. Each change constitutes a new line item on the History tab.

For auditing purposes and to meet ISO requirements, changes to roles are recorded with date and version history.

The following is a summary of the contents in the History tab:

Column name	Description
Permission category	Name of the category where the change occurred. Module, Events, Roles/Users, Templates, or Project Settings.
Permission	Specific permission in the category that was changed.
Action	The action that was performed.
Change date	The date the change took place.
Changed by	The name of the user responsible for the change.

3.23.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.23.2 Steps

To navigate to Module permissions, see steps to access organization level settings in Settings overview.

3.24 READ-ONLY ROLE

Within Compliance or Completions individual modules, you can configure roles with read-only permissions. To enable **Make this role read only**, go to Module settings > **Roles**. Select **Add role** or click an existing role to edit the role, and then select **Make this role read only**. You can select the option in the Module, Events, Roles/Users, Templates, or Project Settings tab.

The Make this role read-only option allows you to only view events and tasks based on their user assignments.

Create and edit categories	Create and edit statuses
Manage module organization exclusions	Create notifications
Create and edit classifications	Create and edit Inspection and Test Plans

The following table is a summary of the read-only role:

Location	Description
Compliance or Completions landing page	 View module tiles according to your assignments.
Module landing page	 View links, forms, and tasks To-do list is not shown because forms and tasks cannot be assigned.
Events page	 View events according to your assignments. View information side panel. Cannot enter information in fields.
Tasks page	 View tasks according to your assignments. View information side panel. Cannot enter information in fields.

3.24.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- When you select **Make this role read only option**, any other permissions previously selected will be automatically deselected.

3.24.2 Steps

To navigate to Module permissions, see steps to access organization level settings in Settings overview.

3.25 USER ASSIGNMENTS

You can use user assignments to assign any InEight Platform user to a Compliance or Completions organization, project, category, and role. The user will have access to manage Compliance or Completions, according to their assignment.

The User assignments tab page shows all users from InEight Platform. The user's name, email, and status are pulled from their profiles in Platform. The designated Roles, Reporting tags, and Last updated information from their assignments are also shown.

In the Add user assignment wizard an assignment consists of one or more users, organizations, projects, categories, and roles.

3.25.0.1 Assignments and History

When viewing a user assignment, the user assignment page shows the Assignments and History tabs. The Assignments tab lists all user assignments. You can filter them by Organization/Project, Role, or Category. The History tab lists the history of all assignment's changes. You can filter them by Change type, Role, Category, Organization/Projects, Reporting tags, Change date, and Changed by.

3.25.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.25.2 Steps

To navigate to User assignments, see steps to access organization level settings in Settings overview.

Add a User Assignment

- 1. Click the Add icon, and then select Add user assignments from the drop-down list.
- 2. Select users to add assignments to, and then click **Next**.

NOTE When you add multiple users, the assignment is listed individually for each user.

3. Select the organizations, projects, categories, and roles to designate for the selected users, and then click **Done**.

NOTE

You can be assigned multiple assignments. Assignments do not affect existing Platform roles.

Transfer user assignments

- 1. Click a user's name. The user assignment window opens that shows all user's assignments.
- 2. Click the **Transfer assignment** icon next to the role you want to transfer.
- 3. In the assignment wizard, select the user, categories, organizations and projects to transfer the assignment to, and then click **Next**.
- 4. In the Confirmation step, click **Transfer**. You can click the Transfer drop-down, and select **Transfer and select next user**, or **Transfer and close**.

NOTE

You can only transfer one role's assignment at a time.

Remove user assignments

- 1. Click a user's name, and then click the **Remove assignment** icon next to the role. The Remove user assignment wizard opens.
- 2. Select organizations, projects, and categories to remove, and then click **Done**.

NOTE Email notifications are sent when adding, transferring, and removing assignments.

View user's assignment history

- 1. Click a user's name, and then select the **History** tab.
- 2. Click **Close** to close the window.

Add reporting tags

- 1. Click the **Add** icon, and then select Add reporting tags.
- 2. Select users to add reporting tags to, and then click **Next**.
- 3. Select reporting tags to include, and then click **Save**.

NOTE To create reporting tags, see <u>Reporting tags</u>.

3.26 INSPECTION AND TEST PLANS

You can manage Inspection and Test Plans (ITP) in the Inspection & Test Plans tab. You can create, edit, copy, create new versions, and import ITPs at the organization level.

	v Settings Quality 🔻					0 ¢	8 🚯 ፤

Electrical Install Version 2 - DRAFT CSI-0000-EL-ITP-0009		Testing ITP name Version 1 - APPROVED ITP description					
42	* * *	1	Ē :				
							5 IT

For more information about managing ITPs, see Inspection & Test Plans.

3.26.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To access Inspection & Test Plans, it must be enabled for the module in org > Product Settings > Module management. For more information, see <u>Module management</u>.

3.26.2 Steps

To navigate to the Inspection and Test Plans tab, see steps to access organization level settings in <u>Settings overview</u>.

For more information about creating ITPs at the organization level, see <u>Create ITPs At The Organization</u> Level.

3. PROJECT LEVEL SETTINGS

3. PROJECT LEVEL SETTINGS

Within Compliance or Completions individual modules, you can configure project level settings to successfully manage projects' business processes. The settings will apply throughout your project within the given module.

In Project Settings, you can manage the projects' ability to use the following:

- Inspection & Test Plans
 - Integrate with Plan components
 - Show Installation Work Package (IWP) widget on the module landing page
- Automapping
- Project Structure
- User Groups

These functions can be enabled on a project-by-project basis.

8	Inspection & Test Plans Enabling inspection and test plans for the project will allow the project to create and manage ITPs.
6	Open Inspection and Test Plans
 (a) (b) (c) (c)	Integrate with Plan components Enabling the integration with Plan components for the project will allow for the creation of templates with ITP headers and associating components with events.
	Show Installation Work Package widget on module landing page
	Automapping When automapping is enabled, users will have the ability to map templates to Project Values in the Project Structure or Components. (Project Structure and/or Integrate with Plan Components must be enabled)
	Ger to Automapping ③ Automapping setup
	Project Structure When project structure is enabled, the structure and metadata defined in Core will be made visible and can be used to sort and filter data. The Project Structure Header template can be created and added to forms to link forms to project structure records.
	User Groups Enabling user groups for the project will allow user groups to be created and managed as well as associated with desired events/tasks.
	Open User Group

Also, at the project level, administrators can manage roles and user assignments. For more information about managing roles, see <u>Roles</u>. For more information about managing user assignments, see <u>User</u> assignments.

3.0.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- You are only allowed to view and not manage other product and module settings that have been configured at the organization level. To manage, click the **Modify at the root level organization** icon in the upper right hand of the page.

≡ :	
>> PRODUCT SETTINGS MODULE SETTINGS	
Module management Template integrations	t
(*)	٩

• For more information about the project settings at the organization level, see <u>Project settings</u> <u>permissions</u>.

3.0.2 Steps

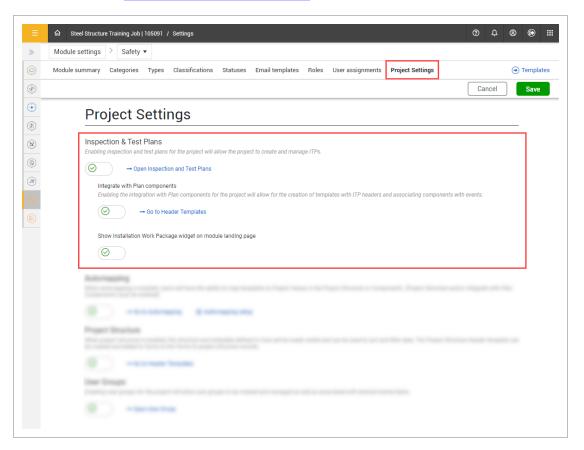

To navigate to Project settings, see steps to navigate to project level settings in <u>Settings overview</u>, and then click the **Project settings** tab.

3.1 INSPECTION & TEST PLANS

Within Compliance or Completions individual modules, you can enable and manage the following features for your project:

- Inspection & Test Plans (ITP) Create and manage ITP's for your project. For more information, see Inspection & Test Plans.
- Integrate with Plan components Create templates with ITP headers and associate InEight Plan components with events. For more information, see ITP header template.
- Show Installation Work Package (IWP) widget on module landing page You can view and manage IWP's from the module landing page in the Upcoming Planned Work tile. For more

information, see Upcoming Planned Work tile.

3.1.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To integrate with Plan, you must enable ITP mapping between Completions and Plan in InEight Plan project settings.

3.1.2 Steps

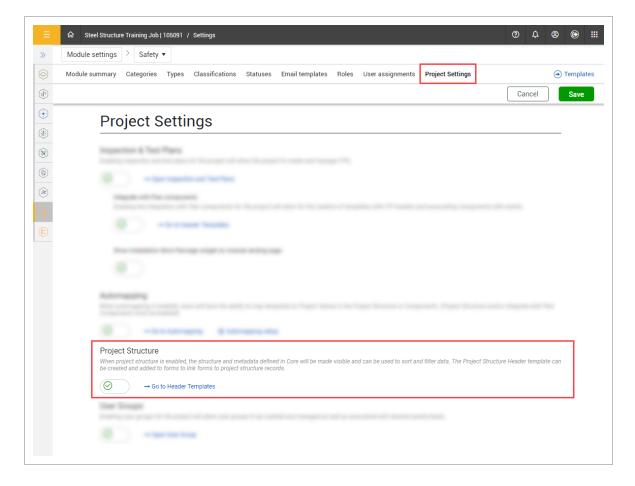

To navigate to Project settings, see steps to navigate to project level settings in <u>Settings overview</u>, and then click the **Project settings** tab.

3.2 PROJECT STRUCTURE

Within Compliance or Completions individual modules, you can enable the Project Structure setting for your project. The setting will apply throughout your project.

When enabled, a Project Structure Header is created in the Headers tab and the structure and metadata defined in InEight Platform shows in the header template. You can use the structure to sort and filter data.

To do this, enable the **Project Structure** toggle. This will enable the **Go to Header Templates** link to access the Headers page.

In the Headers page, you can oversee and manage Project Structure Headers for projects. For more information, see <u>Project structure header template</u>.

3.2.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

3.2.2 Steps

To navigate to Project settings, see steps to navigate to project level settings in <u>Settings overview</u>, and then click the **Project settings** tab.

3.3 USER GROUPS

Within Compliance or Completions individual modules, you can enable user groups to be created and managed for your project. User groups provide access to events and tasks that may be beyond the usual permissions.

	Automagning
	C
	Pager Brutus
	C
	User Groups Enabling user groups for the project will allow user groups to be created and managed as well as associated with desired events/tasks.
	Open User Group

You can use a user group to give access to events and tasks to members of that group, even if they would normally not have permission to view events or tasks in selected categories. User groups can also be used in a template's From Flow option as responsible parties.

After you create a user group, you can assign the user group to individual forms or tasks when you fill them out or when you open an event or task after it has been started.

For example, when a subcontractor is performing work on a project, and another entity is doing quality assurance, the subcontractor will not be part of the project's NCR process and will not be assigned the category for the form. However, if a piece of the subcontractor's work was non-conforming, users from the subcontractor can be associated to a specific user group, and the user group associated with the events (NCRs) to address them.

Click **Open User Group** to open the User groups page tab. In User Groups you can create, edit, copy, deactivate, and delete user groups.

		USER GROUPS INSPECTION 8	& TEST PLAN	s		
				٩	Create u	s <mark>er group</mark>
TW InEight Created Jan 27.2023 07:34 AM Julio Salguero InEight group		Quality tour viewers Created Jan 27.2023 07:35 AM Julio Salguero Viewers of quality forms		Inspection viewers Created Jan 27.2023 07:36 AM Julio Salguero Viewers of inspection forms	,	
2 窓	:	2 28	:	7 28	:	

3.3.1 Considerations

- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.
- To delete a user group, you must deactivate it first, and then remove all users from the group.
- Only users with assignments to the project are shown on the list of Available users. For more information, see User assignments.

3.3.2 Steps

To navigate to User Groups, see steps to access project level settings in <u>Settings overview</u>, and then click **Open User Group**.

Create User Groups

- 1. Click the **Create user group** button, and then fill in the User group name, Description, and select users from **Available users** to include in the group. You can use the search box and select users or use the Select all option.
- 2. Click **Save**. The new group tile will show. The tile will show the group name, date and creator name, description, and number of users in the group.

View, edit, or copy a group

- 1. Click a group tile. The group opens and shows the Detail and History tab. In the history tab, you can view the history of changes, names, change dates, and changed by information.
- 2. In the Details tab, make your changes, and then click **Save**. Select the **Show selected users only** toggle to view the selected users only.
- 3. To copy, click the ellipses in the group tile, and then select **Copy**. A copy of the group is created.

Deactivate and Activate a group

- 1. Click the ellipses in the group tile, and then select **Deactivate**. The group tile will turn gray when deactivated.
- 2. Click the ellipses in the group tile, and then select **Activate** to activate the group.

Delete a group

- 1. You must first deactivate the group, and then remove all users from the group by editing the group.
- 2. Click the ellipses, and then select **Delete**.

This page intentionally left blank.

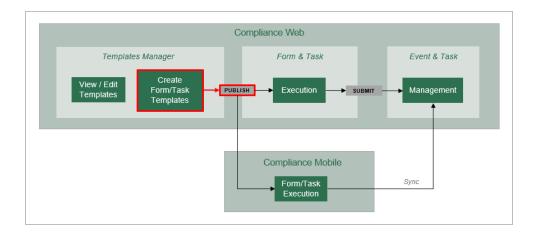

TEMPLATE MANAGEMENT

InEight Inc. | Release 23.10

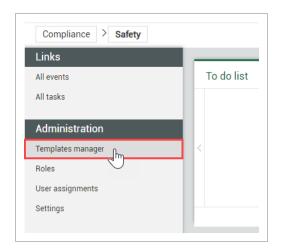

4.1 TEMPLATE OVERVIEW

A template is a task or a form (or checklist) set up in advance for inspections and other tasks that require documentation during the life cycle of your projects.

You can use templates to standardize your organization's form and data capturing process. For example, if your projects always require a safety tour, you can create a safety tour template, so the same safety tour form is used for every project. This leads to capturing the same data from project to project, and to reporting that is clear, concise and meaningful. At the same time, should your project have unique requirements for a safety tour, you can customize your template for your specific project needs.

The Templates Manager is the storehouse for all your template forms. You access the Templates Manager from any of your Module landing pages.

NOTE Depending on your permissions, you may not have access to edit or create new template forms/tasks, but you will still have access to copy them.

Overview – Templates Manager

	Title	Description
1	Filters	Search for a template by keyword or filter down your templates by selecting the appropriate category and/or organization.
2	Form/Task toggle	Toggles between each the Form and Task templates, per module.
3	Template status	Each template has a status: Published - available to fill out via web or mobile device Draft - being built and not yet available for use to fill out Inactive - not drafts, but available to activate when needed Selecting a status option filters to only templates with that status.
4	Template form	Provides key information about the template, including: form name and ID, associations, creation date, time and author, and version. When hovered over, options appear to delete the form (if it is a draft) or to edit, copy, or deactivate the form (if it is published).
5	Available on mobile	This option visually identifies if a template is available on a mobile device. [Shown as the column "Mobile" when in the List View for Tasks.]
6	Favorites	This option filters to templates tagged as favorites.
7	Create new form/task	Click this button to launch the Form Builder/Task Builder page, where you can create a new template form or task.

4.1.0.1 Templates Manager page view

Each template form or task shows key information about the form or task, including:

- Name and Description of the form/task
- Associations
- Availability on Mobile
- Creation date, time, and author
- Version
- Status

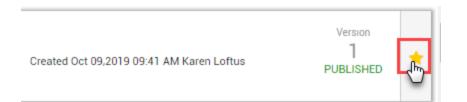

Incident Form		Version	
To be completed by the Lead/Supvr in charge	Created Mar 24,2020 11:57 AM Karen Loftus	3	
View associations			

4.1.0.2 Versioning

A new version is created when a draft is published. Even if no information has changed on the template. Once it enters a draft status and that draft is published it will move to the next version.

4.1.0.3 Favorites

You can select the star at the right-end of the card to mark the template as a favorite.

4.1.0.4 Additional Options

When you hover over the card, additional options appear for the form/task. For draft templates, a delete option appears.

For published templates, options appear to either edit, copy, or deactivate the form/task.

4.1.1 Filters

The left panel of the Templates Manager contains a search bar to look up templates by keyword, as well as filtering lists to narrow down your template list.

There are two filtering categories: Categories and Organization. Checking the box for one of the filter options filters the view to just the templates associated with that filter.

NOTE The only items that appear as choices within the Filters side panel are the ones that have templates associated to them. In other words, you can have more categories or projects in the system, but they won't display in the Filters panel unless you have created a template that uses them.

TIP All the filters work together. If you are not seeing what you need, clear all the filters and start with a fresh search.

4.1.2 Favorites

Selecting the **Favorites** icon filters down your view to just the templates you tagged as favorites. This is a quick way to narrow down to only the templates you use most often.

4.2 TEMPLATE CREATION

With the correct permissions, you can create new form and task templates in the Templates manager.

From the Templates manager page, to create a new template, click the **Create new form** or **Create new task** button.

This launches a two-step process:

- 1. Creates a dialog box, which leads to:
- 2. The Form builder or Task builder

4.2.1 Create a Form or Task Dialog Box

On the Create a form or Create a task dialog box, fill out basic information and settings for the form or task.

NOTE You only have the options to create templates for organizations, projects and categories for which you already have assignments.

Each new form or task requires these initial entries:

Overview - Create a Form Dialog Box

	Title	Description
1	Form or task name and Description	The name or title you give to the template. An optional description can also be added.
2	Category and Organization associations	Associating the form or task with categories and organizations makes it easy to find the form or task using the category and organization filters on the Templates manager page. Categories also determine who can use the forms or tasks. If you do not have assignments to that category, you will not be able to view the form or task to fill it out.
3	Availability on mobile devices	A switch you can turn on to make it available on iOS mobile devices.

Overview - Create a Form Dialog Box (continued)

	Title	Description
4	Event title and date settings	These settings indicate whether the date and title will be filled out automatically with the system default or if they will be filled out with a custom title and date by the person filling out the form or task. An expiration date can also be added if the check box is selected.

* Form name	* Organization association	
Description	C-XYZ (+ Future Children) Select all Deselect all	Q
* Category association Select categories ×

Add expiration date (1)		
Available through form button only? (i)		
	Select organizations you want to be able to perform this form	
	Serect organizations you want to be able to perform this form	
	(Cancel

After being filled out, clicking **Create** creates a new template form or task and the system automatically progresses to the appropriate Form builder or Task builder page. You can continue building your form or task or come back later.

The following steps walk you through creating a new template form.

4.2 Step by Step 1 — Create a Template Form

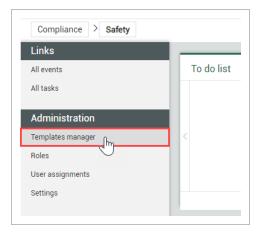

1. From the Project home landing page, select **Compliance** from the left navigation menu.

Steel Structure Training Job	b 105091 / Proj	ect home			Ф (9 🕑

2. Select the **Safety** module.

3. Select **Templates manager** from the side menu.

4. From the Templates Manager page, select **Create new form**.

- 5. On the Create a form dialog box, type **Project Manager Safety Walk** in the Form name field.
- 6. For Category association, select an appropriate item from the drop-down list.
- 7. Under Available on mobile, switch to the **green check mark** to indicate it will be available on a mobile device.
- 8. Change Event title and Event date to User defined.

- 9. For Organization association, select the check box for the highest organization level to make the template available for the entire association.
- 10. Click **Create**. The Form builder opens with a section already created and Event title and Event date already populated on the form.

- 4. From the Templates manager page, select Create new task.
- 5. Add a Description if needed. On the Create a new task dialog box, type **Finalize Safety Walk Process** in the Task name field.
- 6. For Category association, select an appropriate item from the drop-down list.
- 7. Under Available on mobile, switch to the **green check mark** to indicate it will be available on a mobile device.
- 8. Set Task title to System Default.

- The Due date field provides a mandatory date question on the template where the user can provide a date that will become the due date
- 9. Select the Add expiration date check box.
- 10. For Organization association, select the check box for the highest organization level to make the template available for the entire association.
- 11. Select the + Future Children button.
- 12. Click Create.
 - The Task builder opens in the appropriate Category, in a section already created and with Description, Responsible party, Due date and Assign fields already populated on the task
- 13. In the Description field, change the Question text to Identify steps in the process.
- 14. Change the Assign button text to become **Assigned**, keeping the status as Scheduled.
- 15. Click Save.
- 16. Click the **Publish** icon.

4.2.2 Activate, Deactivate, and Copy Published Tasks and Forms

Both tasks and forms can be deactivated, reactivated, and copied after being published. The following step-by-steps use a specific task to walk through the processes.

4.2 Step by Step 3 — Deactivate a Task

- 1. From the Templates manager, hover your cursor over your desired published task.
- 2. Click the **Deactivate** icon.

	Corrective Action Corrective Action Vew associations	Created Jun 08,2020 09:36 AM	W I I I I I I I I I I I I I I I I I I I

4.2 Step by Step 4 – Activate a Task

- 1. From the Templates manager, locate your desired inactive task.
- 2. Select the check box to the left of the ID.
 - After being clicked, two additional icons are shown: Activate and Delete tasks
- 3. Click the **Activate** icon.

• The task is shown in Draft mode in the Status column

4.2 Step by Step 5 — Copy a Published Task

- 1. From the Templates manager, locate a published task.
- 2. In Tile view, hover over the task. On the right side of the tile, three icons are available: Edit, Copy, and Deactivate tasks.
- 3. Click the **Copy task** icon.

4.2.3 Form and Task Builder – Build Tab

The form builder and task builder consist of the following tabs:

- Build
- Properties
- Form flows (forms only)
- History

This section focuses on the Build tab.

Overview - Form and Task Builder: Build Tab

	Title	Description
1	Layout types	Drag and drop columns and sections onto your form or task.
2	Question types	Drag and drop attachments, buttons, dates, times, form buttons, form flows, GPS, integrated lists, references, lists, numbers, people, signatures, and text fields to your form or task.
3	Building area	The blank area you drag your sections and questions onto. It represents the template you are creating.
4	Edit	For existing templates, allows you to edit the existing template.
5	Publish	When finished building the template, click this button to make the template available for use.
6	Section	Lists each section on the form or task.
7	Save	Saves the form or task in its current state. If not yet published, it is saved as a draft.

			BUILD	PROPERTIES FO	RM FLOWS HISTO	DRY	6	₽_ €

🕼 Signature	≡ Text							

NOTE If you click **Cancel**, all changes are deleted since your last save. The system does not automatically save.

4.2.3.1 Layout Types

Layout types let you divide your form or task into sections. Perhaps your form or task covers different topics or areas and you want to organize the form or task accordingly.

When you first drag a section onto the form or task, it creates a section that extends the width of the form or task.

			BUILD PROPERTIES FORM FLOWS HISTORY	Ľ
yout types				Cancel Saw
Column	Section		SECTION	
estion types				
Attachment	Button	SECTION HEADER		
D Choice	Date - Time		* Event date

GPS	← Integrated list		(250 characters remaining)	
6 Reference	III List	Y		
e Number	People picker		Add fields to your form by dragging types from the left panel to the blank section above	

You can let users copy sections when filling out a form or task. This feature lets users determine if duplicate sections are needed, instead of creating templates with duplicate sections in advance.

To let users copy a section, click the section header, and then select the **Enable copy section** check box in the side panel.

You can change the text of the button. By default, it is named Copy section.

NOTE

You can enable the copy section option only for sections without mandatory questions, form buttons, or associated tasks.

¢ Number	People picker	Click to type use question	
🖉 Signature	🗈 Text		(250 characters remaining)

The following is a brief overview of each question type and its key characteristics.

Overview – Question Types

Question Type	Image	Description
Attachment	Provide photos from the tour (+) Select files or drag and drop	Enables an attachment (for example, photos, documents) to be added to the form or task. You can include additional text with this question if needed (for example, for instructions.) Attachments can be marked as Mandatory. If integration with InEight Document is set up, attachments can be supporting documents from the Document application.
Button	Submit the completed tour	Adds a button to the form or task. You can set the button to close and/or change the status of the form or task. The button type can also be marked as single-use or multi-use. Buttons can be marked as Mandatory.
Choice	Did you recognize any safety wins? Yes No	Adds a question with two options. Settings include icons and predefined text answers (e.g., yes/no, pass/fail, and accept/reject) or you can customize your own. Choices can be marked as mandatory. You can mark answers as exceptions.
Date - Time	Click to type your question 04/30/2019 04:22 PM	Adds a field to fill out either date and time, just the date, or just the time. Dates can be marked as Mandatory.

Overview -	Ouestion	Types	(continued)
	Question	Types	(continucu)

Question Type	Image	Description
Form Button	Click to type your button text	Adds a button that opens another template from within your form or task. It can be designated as single-use or multi-use. Form buttons can be marked as Mandatory. You can set this button to change the form or task's status when it is clicked. Status change does not affect the form or task that is opened by the button.
Form Flow Button	Submit to manager for approval	Adds a button that facilitates a specific step in a form flow. Form flow buttons can also go back to a previous step.
GPS	Please provide location information CPS Latitude Example:41.257900 Longitude Example:-96.080500 Elevation Example: 100 m / 328 ft Clear GPS	Lets users enter their location coordinates. Coordinates can be entered manually or by clicking the button.
Integrated list	Integrated list Select one	Adds the integrated list question type to your form that integrates with InEight Platform Master data list resources.
Reference	∞ Reference	Adds a supporting document attachment, event or task, or a hyperlink to other pertinent information. References cannot

Overview – Question Types (continued)

Question Type	Image	Description
		be marked as Mandatory.
List	Indicate the quality of this section Very Good Good Fair Poor Very Poor	Adds a multiple-choice question to the form or task. Answer options include radio buttons, check boxes, drop-down lists, or multi-level drop-down lists. You can select answers from predefined lists or create your own. Lists can be marked as Mandatory. You can set default values for radio buttons, check boxes, and drop-down lists. Default values are selected when a user opens a form or task and requires the user to manually select a different value. You can mark answers as exceptions. For more information about multilevel drop-down lists, see <u>Multilevel Drop-Down Lists</u> .
Number	How many widgets were fastened?	Adds a question that requires a numerical answer to the form or task. The number can be formatted to be currency, decimal, \$, %, or phone number. Numbers can be marked as Mandatory.
People Picker	Who led the tour?	Adds a question that must be answered by selecting users from the drop-down list. People pickers can be marked as Mandatory. You can let end users

Question Type	Image	Description					
		select multiple users or none. You can also select whether end users can choose from only assigned users, who have a Compliance role, or all project- level operational resource, which includes users who do not have Compliance roles. You can also show users' employee IDs with their names and set up an email to send when a user is selected. Operational resources are managed in project home page > Assigned operational resources.					
Signature	Click to type your question	Adds a signature block to the form or task. Signatures can be marked as Mandatory.					
Text	How many wins? (150 characters remaining)	Adds a question that requires text for the answer. The field can be short or long text, or you can use this question type to only be a label with no text field. Text can be marked as Mandatory.					

Overview – Question Types (continued)

4.2.3.3 Question Settings

After a question is added, you can click the question in the section.

Click to type your question	⊡ ⊗ ቀ
	(200 characters remaining)

TIP

A slide-out panel is shown on the left. You can type your question and define the settings related to the question. As you type the question, the question populates into your template.

You can also click on the text within the question type on the form or task and it will enter the text on the slide-out panel.

All question settings include the option to make the question mandatory. This means the person filling out the form or task is not able to submit the form or task until the question is answered.

You can mark responses to list and choice questions as exceptions. This feature is useful to indicate responses that are undesired or outside of normal business processes in some way and have those exceptions show in reporting. To set a response as an exception in the form or task builder, select a response to a list or choice question. In the Details side panel, select the **Exception** check box. An Exception icon is added to the right of the response. This icon is visible only in the builder.

	× *	BUILD	PROPERTIES FORM	1 FLOWS	HISTORY	(2

Logic	~	* Where is the safe	ety walk being performed?			* Event date 05/31/2022		Ê
Email	~		(250 charac	sters remaining)				
		Is PPE being worr						
		No						

4.2.3.4 Access

Settings for each question and section also include an Access section with a Manage access button. In the Manage access dialog box, you can control which users or roles can view or answer each individual question or entire sections when filling out the form or task. If they do not have access, they do not see the question on the form or task.

View and edit permissions are set separately from each other. You can manage access for all sections and questions in a template in the dialog box. It does not matter which section you choose when you click the **Manage access** button.

To control who can see data in reports on question responses, add reporting tags in the Access section. Users with the same reporting tags that you set here are able to see this data when using reports.

4.2.3.5 Logic

The Logic setting lets you show or hide a question based on the response from another question on the form or task. For example, you are creating template for a safety tour, and have added the Choice question "Did you recognize any safety wins?"

Did you recognize any safety wins?

O Yes				
🔘 No		 	 	

Following this question, you add a Text question for them to indicate the wins they had, but you only want this question to show up if they answered yes to the previous question (did you recognize any safety wins?).

Under the Logic section of the Text question's properties, you select Leading questions.

* Question text		Location of Safety Tour

1	SHOW Safety wins: explanation when <u>ANY</u> of the following rules match			8	
* Question text Safety wins: « Type your quest	Did you recognize any safety wins? Select a question	Yes Select a response	•		
Type				(➔) Add logic rule	

- TIP Depending on the form or task, you can show or hide the question depending on how the other question is answered.
- TIP If there is a form flow button that can be reversed, you can apply separate leading logic sets to the reverse form flow button and the form flow button that advances to the next step.

4.2.3.6 Classifications

You can use classifications to apply logic in your forms in List and Choice questions. For more information, see <u>Classifications</u>.

4.2.3.7 Copying, Deleting and Moving Questions

When hovering over a question on your template, three options are shown:

- Copy creates a duplicate question in the same section.
- Delete removes the question from the template.
- Move lets you drag and drop the question to a different area on your template.

Did you recognize any safety wins?	(+	⊗	÷
Yes			
O No			

TIP

You can move questions by clicking and holding anywhere on the question and dragging it into place.

4.2.3.8 Using the Form and Task Builder – Build Tab

The following Step by Steps walk you through building out a template using the Task builder and Form builder.

4.2 Step by Step 6 — Build a Template Using the Task Builder

1. From the Task builder page of the **Finalize Safety Walk Process** template you created in the previous Step by Step, confirm your form mirrors this design:

nalize Salet	y Walk Process	Draft	BUILD	PROPERTIES HISTORY		⊠ €
ayout types		All changes have been saved (9.03 AM)			🖌 Cance	el Save
Column	E Section	Finalize Safety Walk Process				
uestion types						
Attachment	Button	* Identify steps in the process				
Choice	Date - Time					
Form Button	♥ GPS					li li
La Form Button	V GF3				(4000 characters re	maining)

# Number	O People picker	* Responsible party				
🕼 Signature	≣ Text	Hesponsible party				4
		* Due date				
		12/27/2019				
		🗂 Schedule				

- 2. Drag and drop the **People Picker** question type into the existing section underneath the Due date question.
- 3. Click on the question and type **Name of person conducting the next Safety Walk** in the Question text field.
- 4. Select the Mandatory check box.
- 5. Click the **People Picker X** to close the settings slide-out panel.
- 6. Drag and drop the **Date Time** question type to the right edge of the Name of person conducting the next Safety Walk question, so it becomes a second column on the same row.
- 7. Make the title of the Date-Time field, **Date of upcoming Safety Walk**.

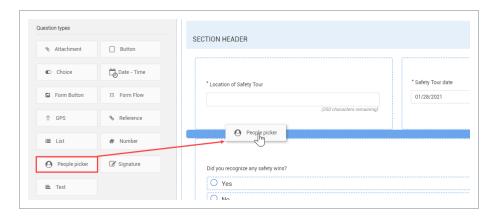

- 8. On the Details panel, change the Type to **Date** so the answer selection will only be for a date, not a time.
- 9. Close the settings slide-out panel.
- 10. Click the **Assigned** button and notice the "Close task upon the button selection" is selected and grayed out. Ensure that Change status to is **Scheduled**.
- 11. In the upper-right corner, click **Save** to save your new template task. A notification is shown indicating the time the change was saved.
- 12. To make the template available for use, click the **Publish** icon.

4.2 Step by Step 7 — Build a Template Using the Form Builder

1. From the Form builder page of the Project Manager Safety Walk template you created in the previous Step by Step, confirm your form mirrors this design:

Location of Safety Tour	(200 characters remaining)	Safety Tour date 03/24/2020	Ê
Did you recognize any safety	wins?		
O Yes			
0 No			

- 2. As needed, close a settings slide-out panel.
- 3. Drag and drop the **People Picker** question type into the existing section underneath the Location and Date questions.

- 4. Click on the question and type Who is leading the tour? in the Question text field.
- 5. Close the People Picker settings slide-out panel.
- 6. Drag and drop the **Date Time** question type to the right edge of the "Who is leading the tour" question, so it becomes a second column on the same row.

			 _
Who is leading the tour?			Date -
			4

- 7. Click on the Date Time question and type **Time of tour** in the Question text field.
- 8. Under Type, select **Time** so the answer selection will only be for a time, not a date.

Details ^ * Question text	^
* Question text	
Time of tour	
Type your question	
Type O Date - Time O Date Time	

- 9. Close the **Date Time** settings slide-out panel.
- 10. Drag and drop the **Text** question below these two questions.
- 11. Click on the question and type **Explain the agenda for the tour** in the Question text field.
- 12. Under Type, select **Long** so the user has more room (4000 characters) to enter a response when filling out the form.

- 37. Click Save.
- 38. In the upper-right corner, click **Save** to save your new template form.

- A dialog box is shown indicating the time the change was saved.
- 39. To make the template available for use, click the **Publish** icon.

Multi-Level Drop-Down Lists

Using the **List** question type, you can build branching questions using a multilevel drop-down list. For more information, see <u>Multilevel Drop-Down Lists</u>.

Referenced Forms and Tasks

When you create a task or an event from another task or event, you see the referenced item in both associated tasks or events, letting you see which events and tasks are associated. For more information, see Referenced Forms and Tasks.

4.3 MULTILEVEL DROP-DOWN LISTS

Using the List question type, you can build branching questions using a multilevel drop-down list. When you make a selection from a list of question options, your response branches off to another question. This functionality helps you manage list items better for greater control of data in the database.

A multilevel drop-down list can be nested at several levels. For example, this type can be useful for showing a complicated organizational structure.

In the List side panel, there are options to make features of a multilevel drop-down list mandatory:

- Mandatory The multilevel drop-down list question must be answered.
- Mandatory terminal response The user must go all the way to the last level of the list to make a selection, instead of just clicking through without expanding the list beyond the first level. If you select this option, you cannot select Mandatory required level.
- Mandatory required level You must select a mandatory required level from a drop-down list that determines how many levels down users must expand the list to make a selection, instead of clicking through without expanding the list beyond the first level. If you select this option, you cannot select Mandatory terminal response.

When you click **Manage list options**, the List options dialog box lets you organize list options manually or through Excel import.

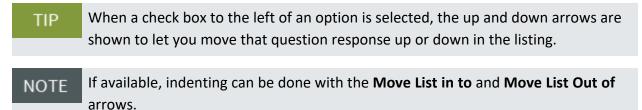

In the dialog box, there are buttons to add and remove options, as well as move them up and down in the list, and in and out of other options to create a hierarchy.

Import	List	
Drag and drop the file here or browse	⊕ ↑ ↓ ↦ ← ⊗	
Browse	□ × List options	
File must not exceed 5 MB	Option1	
↓ Download multi-level list starter template	Option2	
	Option3	
		Ψ

NOTE There can be up to a maximum of 10,000 items in the complete list, including all items in the levels.

4.3 Step by Step 1 — Add a manual multilevel list question

- 1. In a form, drag the List question type onto the form or task.
- 2. In the Question text field, type in the question.
- 3. In the Type drop-down list, select the **Multi-level drop-down** option.

Add list option and Delete list option icons are available for you to use.

- 4. Select the check box of the second list item, and then select the indent or the **Move list option in to** icon.
 - That option now falls below, or within, the item above it.
- 5. Unselect the second list item.
- 6. Select the third list item.
- 7. Indent the third list option using the **Move list option in to** icon.

• Your List option dialog box should look similar to this example:

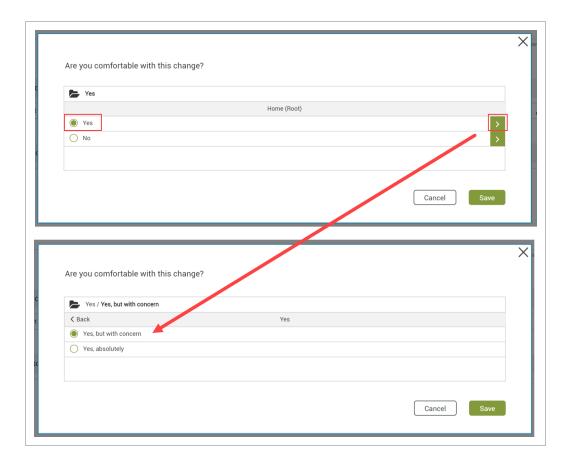

List		
+	$\uparrow \downarrow \rightarrowtail \leftarrow \otimes$	
	★ List options	
	✓ Yes	-
	Yes, absolutely	
	Yes, but with concern	

- 8. Add three more list options, using the Add List Item icon.
- 9. With the final two items, use the Move list option in to icon to indent them.
 - Your List option dialog box should look similar to this example:

+	$\uparrow \downarrow \rightarrowtail \leftarrow \otimes$
	✓ Yes
	Yes, absolutely
	Yes, but with concern
	∼ No
	No, though I have a question

10. Click Save.

- 11. Click Publish.
 - As a result, when the form or task is opened, the first question can be answered, which then leads to branched options for the second question.

To create a multilevel drop-down question using the template from Excel, first click the **Download multi-level list starter template**. The template has one Example sheet with instructions on how to use it. You can then fill out the Import sheet with list options for as many levels as necessary.

This step-by-step walks you through adding items through the multilevel list start template.

4.3 Step by Step 2 — Add a multilevel list using the list starter template

- 1. In a form, drag the **List** question type onto the form or task.
- 2. In the Question text field, type in the question.
- 3. In the Type drop-down list, select the **Multi-level drop-down** option.
- 4. Click on Manage List Options.
- 5. Click the **Download multi-level list starter template**. The Excel file downloads.
- 6. Click Enable Editing if needed.
- 7. Save the template file to your desired location.

- There are two tabs, the Example tab, and Import, the latter of which you use to create your multilevel branching template.
- 8. Open the Import tab.
- 9. Create a Level 1 item in Column A, PMH1 in the example.
- 10. In Column B, create the Level 2 item, Segment 1 in the example.
- 11. In Column C, create the **Level 3** items, or decision points, Roadway, Structure, and Walls in the example.
 - This means that when a user selects a Column B segment, they will have three additional choices from Column C in the next drop-down list
- 12. In column D, add Level 4 options.
 - In the example shown, there are only Level 5 options in Column E for Hwy 1, Eastbound and Hwy 1, Westbound

	A	В	C	D	E
1	Level 1	Level 2	Level 3	Level 4	Level 5
2	PMH1				
3	PMH1	Segment 1			
4	PMH1	Segment 1	Roadway		
5	PMH1	Segment 1	Roadway	Hwy 1, Eastbound	
6	PMH1	Segment 1	Roadway	Hwy 1, Eastbound	Hwy 1 EB to Phoenix exit
7	PMH1	Segment 1	Roadway	Hwy 1, Eastbound	Hwy 1 EB to Central Ave
8	PMH1	Segment 1	Roadway	Hwy 1, Westbound	
9	PMH1	Segment 1	Roadway	Hwy 1, Westbound	Hwy 1 WB to 101
10	PMH1	Segment 1	Roadway	Hwy 1, Westbound	Hwy 1 WB to Scottsdale Rd
11	PMH1	Segment 1	Structure Segment 1		
12	PMH1	Segment 1	Structure Segment 1	1st Ave	
13	PMH1	Segment 1	Structure Segment 1	TUC #2 overpass	
14	PMH1	Segment 1	Structure Segment 1	101 WB overpass	
15	PMH1	Segment 1	Walls Segment 1		
16	PMH1	Segment 1	Walls Segment 1	TUC A0	
17	PMH1	Segment 1	Walls Segment 1	TUC A1	

- 13. Save the Excel file.
- 14. Go to Compliance, and then click **Browse**.
- 15. Navigate to the folder where your Excel file is located.
- 16. Select the file, and then click **Open**.
- 17. The Excel data populates. Click **Save**.

4.4 REFERENCED FORMS AND TASKS

When you create a task or an event from another task or event, you see the referenced item in both associated tasks or events, letting you see which events and tasks are associated.

When you create a new event, you can select the **Associate Task** check box.

When you do that, two things occur. First, the Task Button is shown, in this case in the Section Header. Second, a number of changes in the Details panel occur, including:

- The Task Button Text area shows up where you can modify the name of the button
- The Type lets you choose from Single-Use or Multi-use
- The Template to Open Upon Button Selection drop-down list requires you to select a Task template
- · And the Associated Categories drop-down list requires a selection

After any other changes are made, select **Save**.

TIP You are also able to start a task from the Section area of an event, not just a question, which is useful for reporting purposes.

4.5 INTEGRATED LIST

4.5.1 Summary

When building your template form, the Integrated list question lets you build lists that integrate with InEight Platform master data library. The Integrated list question lets you add resource column fields in a series of cascading questions. You can use cascading questions to narrow down the selection of a resource. For example, you can add Vendor Region, Vendor Country, and Vendor City column fields of cascading questions to narrow the selection down to a city. The list pulls data from Platform's resources in Main menu > Master data library.

NOTE

Currently, the Integrated list feature is only available for Operational resources equipment and Vendors master data.

After you add the integrated list question, select the question, and then click the **Configure** button to choose from your selected resource's column headings to add to the list.

The series of selected column headings fields show as a hierarchy and can be modified in any order.

ntegrated list	С	onfigure			\times	
Details		Add to list		↑ ↓ ⊗		cel Save
		Equipment list options				
Master data lists		Equipment ID		✓ Equipment Location	-	-

					/ \/

4.5.2 Steps

To add and configure an integrated list:

- 1. In a new or unpublished form, drag the **Integrated list** question into the form.
- 2. Click the Integrated list question.
- 3. In the left slide-out panel, select from the Master data lists drop-down resources.
- 4. Click the **Configure** icon, and then select the fields to add to the list.
- 5. Click Add to list.

Each field becomes a drop-down question in the form or task template and shows in a cascading manner. You can use the **Move up** and **Move down** arrows to modify the columns in a logical order according to your business process.

6. Click Save.

You can reorder, add, and delete from your list by clicking on any of the list column attributes, and then clicking **Configure**.

The Properties tab also includes the following fields, which you can edit at any time with the right permissions:

- Form or Task name
- Description
- Category association with + Future Children functionality

- Organization association
- Options

4.6.0.1 Task and Form Builder Options

In Form builder, both the Event title and Event date fields have the option of being System defined or User defined. Both can be used strategically to personalize your form.

vailable on mobile ?	Event title 🛈	Event date 🛈		
Θ	System default	 System default 	▼ Add expiration date (i)	
vailable through form b	,	egration tag 🛈		
Θ				
nable print functionality				

Form Builder: Event Options

	System Default	User Defined
Event title	The event title defaults to the "name of the form_ event ID" and is presented on the event list as the event title.	This provides a mandatory text question on the form where the user can provide a title that is presented on the events list as the event title.
Event date	The event date defaults to the date the form was started.	This provides a mandatory date question on the form where the user can provide a date that is presented on the events list as the event date.

In Task builder, both Task title and Due date can be used strategically to personalize your task.

Task Builder: Task and Due Date Options

Task title	The task title defaults to	This provides a mandatory text

Task Builder: Task and Due Date Options (continued)

	System Default	User Defined
	the "name of the task_ task ID" and is presented on the task list as the task title.	question on the template where the user can provide a title that is presented on the task list as the task title.
Due date	Not applicable	This provides a mandatory date question on the template where the user can provide a date that is presented on the task list as the due date.

4.6.0.2 Expiration Date

Notice that when the Add expiration date check box is selected, the Add renewal date option is shown.

Selecting Add expiration date makes this a mandatory field on the form. If selected, the Add renewal date also provides a mandatory question on the form.

Form Builder: Date Options

	Definition
Add expiration date	This selection provides a mandatory date of expiration question on the form. This question and the value show on the event list as well after the form has been filled out.
Add renewal date	This selection provides a mandatory date of renewal question on the form. This question and the value show on the event list as well after the form has been filled out.

NOTE After the form is published, only certain fields in the properties may be changed without putting the form into a draft status.

4.6.0.3 Template Availability

To hide a template from being started as a stand-alone form or task, turn on the **Available through form button only?** toggle. When hidden, these templates can be used only through association with

the Form Button.

4.6.0.4 Integration Tag

You can add an integration tag to a template to include the form in reporting. Specific questions in that form with the same integration tag are then reported on. This applies only to standard reports.

4.6.0.5 Template Integration

Template integration is helpful when you need to use a task in InEight Change. For more information about template integration, see <u>Template Integration</u>.

4.6.0.6 Enable Print Functionality

You can enable a template to be printable from the Events or Tasks page, and from the event or task detail page.

NOTE Pay special attention when enabling the print feature. This feature does not contain any permissions associated with the event or task. If you have access to the work item and can print it, you can print all questions and answers in the work item.

To enable a template to be printable, turn on **Enable print functionality**, and then select which report to run. Currently, only the Compliance General Forms Integration is available.

4.6.0.7 Template Language Settings

Template language settings let you import translations for each question and section in a Microsoft Excel spreadsheet. For more information about how to import translations, see Template Translation.

4.6.0.8 Organization Association

On the Properties tab, selecting a project is as simple as selecting the check box next to the project name.

In any parent level, you can click the **Select all** or **Deselect all** option, if appropriate.

Projects not available to you are grayed out.

Clicking the **+ Future Children** button in a parent organization allows you to associate templates and users with that parent organization and all its children with just one click. The association can also

persist through any new children (projects) that get associated after the original selection, so you do not have to manually add each project.

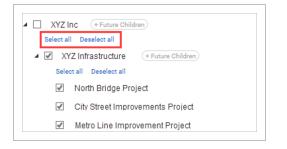

TIP After the + Future Children button is selected, it changes color.

Select Only the Parent Organization

When you select a parent organization, only that organization is selected. If the parent organization has child suborganizations or projects, those children are not automatically selected when you select their parent. This change gives you the flexibility to fine-tune which children to associate.

Select or Deselect All Child Organizations or Projects

The **Select all** and **Deselect all** buttons are available for each parent organization with children. When you use these buttons, only the children are selected or deselected. The parent organization is not affected.

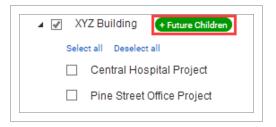

NOTE

When you select all, only existing children are selected. New projects are not automatically selected unless you use the + Future Children option. See the next section for more information.

Persistently Associate Future Children

The + Future Children button is available for each parent organization. If you enable this option, all new children of that parent are automatically selected. This option prevents having to constantly select each new project when you create one.

NOTE The + Future Children option works independently of the Select all option. For example, if you want to select all future new projects, but not necessarily all existing ones, you could select a few existing projects, or none, and still enable + Future Children.

4.6.0.9 Manage Custom IDs

Custom IDs let you sort and filter forms and tasks for better management of your events and tasks. You can also assign multiple custom IDs to one template and add or remove properties for existing custom IDs.

The following Step by Step shows you how to create a custom ID.

4.6 Step by Step 1 – Add a Custom ID

1. Click Actions > Manage custom IDs in the upper-left of the Form or Task builder's Properties tab.

Module landing > Templates manage	Form builder		
		BUILD	PROPERTIES
Actions 🔻			
Manage custom IDs Im Manage template integrations	Properties		

- The Manage custom IDs dialog box opens
- 2. Click the **Add** icon to open the Add custom ID wizard.

2					
٥	Add	Custom ID	Organization/Projects	- Categories	
	€	ABC-0001-XYZ	C-XYZ (RootOrg1), Steel Structure Training Job (105091), Steel Structure Training	g JSA's	

3. Enter values in the Prefix, Starting number, and Suffix fields, and then click Next.

 NOTE
 You must fill out at least one of the fields, but you are not required to fill out all of them.

 NOTE
 Each of the fields can be up to 10 characters long. Prefix and Suffix are

NOTE Each of the fields can be up to 10 characters long. Prefix and Suffix are alphanumeric, and Starting number is only numeric.

- 4. Select the organizations and projects you want the custom ID associated with.
- 5. Optionally, select Apply this custom ID to each selected project.
 - NOTE When this option is selected, the custom ID number increases independently for each project. For example, if the custom ID starts at CUS-200-ID and this option is selected, when you perform the form or task twice in Org/Project 1, the ID increases from CUS-200-ID to CUS-201-ID. If you then perform the same form or task twice in Org/Project 2, the ID also increases from CUS-200-ID to CUS-201-ID independently from the ID numbering in Org/Project 1.
- 6. Click Next.
- 7. Select the categories you want the custom ID associated with.
- 8. Click Save & close.

TIP

You can also click **Save & add new** to immediately add another custom ID.

4.7 TEMPLATE INTEGRATION

Template integration lets you make tasks available for use with InEight Change. For example, you might need to complete a task associated with a change issue.

NOTE Template integration works only with InEight Change tasks.

The functionality to add an integration is in the template Properties tab. To add a template integration to a template, you must have a level 3 admin role, and the template must have already been published. If you do not have a level 3 admin role, you can see the Add template integration button, but you cannot use it.

The following steps explain how to add an integration to a template.

4.7 Step by Step 1 — Add a template integration

1. On the Properties tab of the task builder, under Options, click **Add template integration**. The Add template integration dialog box opens.

	V V *

You can also access the Template integrations page from the Product Settings page. For more information about product settings, see <u>Product Settings</u>.

4.8 TEMPLATE TRANSLATION

Templates can be translated into multiple languages with a Microsoft Excel template. When a template has translations applied, users can change the language in their user profile and view events and tasks in their selected language. Translation requires language setup in Module summary settings and Excel template export and import in Template properties. The export functionality gives you a template spreadsheet file with all of the questions and sections to fill out and import back into the form or task template.

4.8.1 Module Summary Setup

To make a language available in a module, go to Settings > Compliance > Module > **Module summary**, and then select the language in the Module language settings section. See <u>Language settings</u> for more

information.

4.8.2 Template Language Settings

You can export and import the translations Excel file in the template Properties tab under Template language settings.

	BUILD PROPERTIE	S FORM FLOWS HISTORY	
ions 🔻			Cancel
Select categories you want to associate to this form		C-XYZ-ND (Futur Chlore) Select all Deelect all Select organizations you want to be able to perform this form	
Available on mobile ? Event title ① System default Available through form button only? ① Inte Enable print functionality	Event date ① System default gration tag ①	■ Add expiration date ④	

NOTE You must publish the template before exporting the Excel file. The Export and Import buttons are enabled only after you publish a template.

The following Step by Step shows you how to import translations.

4.8 Step by Step 1 — Import Template Translations

1. In the Template language settings, select a language from the drop-down menu.

NOTE If you do not see the language you want, go to Settings > Compliance > Module > Module summary, and then select the language in the Module language settings section.

2. Click Export.

- A Microsoft Excel spreadsheet file is downloaded with all of the template questions and sections in rows
- NOTE After you export the Excel template, do not edit the published template until after you import translations. If the template is edited, you must publish the new version, and then export the Excel file again. If you try to import the old version of the Excel file, it results in an error.
- 3. Under the column for your chosen language, enter translations for each question and section.
 - NOTE See the section below for more detailed information about translation template columns.
- 4. Save the file.
- 5. In the Template language settings, click **Import**, and then select the saved spreadsheet file.
- TIP If you make any further changes to the template, you must publish the template again, and then repeat the steps above.

4.8.3 Translation Excel Template

The translation template Excel file is created from the current published version of the form or task template.

The Excel file consists of the following columns:

- A. (hidden) **Object ID** Do not edit this column. These are specific IDs for form or task items. The numbers change between published versions of the form or task.
- B. (hidden) **Characteristic type** Do not edit this column. This is the question type and is required for the migration path of information used in the import.
- C. (hidden) **Object type** Do not edit this column. This is the type of form or task item and is used in the import process. The types are section, section supporting text, question, question supporting text, option, option supporting text, hyperlink text to display, and form flow title.
- D. **Type** Do not edit this column. This shows each type of question.
- E. Info Do not edit this column. This shows what object type and part of the template the row refers to. The object types are section, section supporting text, question, question supporting text, option, option supporting text, hyperlink text to display, and form flow title.
- F. Section/Section supporting text/Question/Question supporting text/Option/Option supporting text/Hyperlink text to display/Form Flow Title – This is the English version of entered text for each object type.

- G. All columns following F are for other languages. Enter your translations for each object in these columns for each language.
 - TIP You can apply HTML formatting such as bold, highlighted, and underlined to supporting text. HTML code is shown in column F. If you want to apply the same formatting to other language columns, you must manually enter or copy the HTML code to the other columns. If you do not enter or copy the code in the translated columns, the translation is shown as plain text.

4.9 FORM FLOWS

The Form Flows tab of the Form builder lets you manage all the form flows associated with a form template. A form flow adds workflow functionality to your form so that responsible parties can be actively engaged in an event's process life cycle. Including a form flow can be helpful if your business process needs to be handed off from the reporter to another individual or department. Each step of a form flow has an associated form flow button in the template that you, as a responsible party, can click to complete your part.

NOTE Language Code of EN indicates English. Do not change the language code for any column.

Multiple form flows can also be added to a form to suit your specific business processes. For example, when filling out a form, you might need manager approval to proceed sometimes, but not every time. In this case, you could have one form flow for when manager approval is required, and another form flow when it is not required. Each form flow's steps are independent of each other but contained in the same form.

The Form Flows tab is separated into the following areas:

- 1. Each form flow is shown as its own card with a description and number of steps.
- 2. When a form flow is selected, each of its steps is shown as a card with information like the associated button, the responsible party, and the number of days until the step is overdue. You can also add a new step here.

3. The side panel lets you edit fields associated with the selected form flow or step.

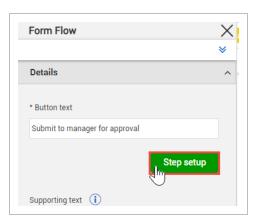

4.9.1 Create a Form Flow

To create a form flow, you must use both the Build and Form Flows tabs to associate form flow questions with a form flow and its steps.

TIP To efficiently plan and create a form flow, you can build your form with all of its form flow questions before moving to the Form Flows tab to associate those questions with steps.

There are two ways to start creating a form flow:

• From the Build tab, in the Form Flow Button's side panel under Details, click **Step setup**, and then click **Next** if you see a dialog box that says no form flows exist

• From the Form Flows tab, click **Create form flow**

					Create form flow.
	No f	form flows e	xist.		\bigcirc
Click the Cre	eate form flo	ow button to	create a ne	ew form flow.	

The following step by step walks you through the process assuming that you start from the Build tab.

4.9 Step by Step 1 — Create a Form Flow

- 1. In the Build tab, add a form flow question.
- 2. In the Form Flow Button's side panel under Details, click **Step setup**.
- 3. Click Next if you see a dialog box that says no form flows exist.
- 4. In the Create form flow dialog box, fill out the Form flow name and Description.
- 5. Select the Step 1 card.
- 6. In the Step 1 panel on the left side of the page, in the Details section, select which form flow button to use for this step and who is responsible.

Step 1		×				
		≈ [-		
Details		^	Incident report Workflow to submit and complete an incid	ent report

Original Reporter	~		Step 1		Ste	ep 2
			Submit to manager for review		For	m Finished
Email		^	0	→ +	>	
(+) Add email			Original Reporter	Add St	ep Orig	ginal Reporter

7. Optionally, if you want to send an email notification to the responsible party for this step, click **Add email** in the Email section and complete the dialog box.

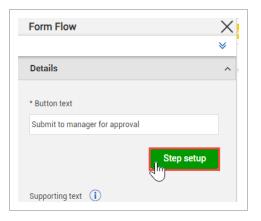

NOTE The email notification indicates the start of the step after clicking its form flow button, not the step's completion.

4.9.2 Set Up Form Flow Steps

You can add a new step to a form flow through the Add Step button in the Form Flows tab or the Step setup button of a form flow question in the Build tab. The Add Step wizard contains several pages of options. After you have added a step, you can edit any of this information by selecting the step card and editing the fields in the left side panel.

There are two ways to start setting up an additional form flow step:

• From the Build tab, in the Form Flow button's side panel under Details, click **Step setup**

• From the Form Flows tab, click Add Step

Step 1		Step 2
Submit to manager for review		Form Finished
Original Reporter	★ (+) Add Step	→ Original Reporter

The following step by step walks you through the process assuming you start from the Build tab and have at least one form flow and form flow question.

4.9 Step by Step 2 — Set Up an Additional Form Flow Step

- 1. Add a new form flow question in the Build tab.
- 2. In the Form Flow button's side panel under Details, click Step setup.
- 3. On the Step details page of the Add Step wizard, select the form flow button to use for this step.

NOTE If you started the Add Step wizard from the Build tab, this option is already filled with the form flow button you selected.

- 4. Select whether this step can move to the next step when all responsible parties complete it or any one of them completes it.
- 5. Select who is responsible for this step.

- If you select Users, you must select a specific user.
- If you select **Role**, you must select which role and whether the user can choose an individual from the selected role to be responsible.

TIP You can let the user choose an individual from the selected role if, for example, one individual with that role is off work and cannot complete the step.

- 6. Click Next.
- 7. On the Email page, select whether you want to add an email that notifies responsible recipients each time this step is reached, and then enter the contents of the email.

NOTE The email notification indicates the start of the step after clicking its form flow button, not the step's completion.

You can personalize the email by pressing the *@* key and selecting responses to questions in the form to insert.

8. Click Next.

TIP

- 9. On the Actions page, select the status the event changes to when this step is initiated.
- 10. Select how many days until this step becomes overdue and whether the days are counted from the initiated date or the previous step.
- 11. Optionally, select **Make this step reversible** to let users go back to a previous step. Select which step to go back to, whether to cc recipients to the email, and whether to require a comment when reversing.
 - NOTE If you make a step reversible, you must go back to the Build tab after the step setup to edit the text of the new button, which is named Reversal form flow button by default.

TIP The reverse form flow button can have leading logic applied to it independently from the button that advances to the next step.

- 12. Click Next.
- 13. On the Step access page, set view or edit access by role for each form question or section when the event is in this step. Access rules are shown as a table with the ability to view and edit as columns and questions and sections as rows. When you select a cell, a slide-out panel shows options for all roles, a select role, or no roles.

Notity Manager		Send to Salety Manager

What was the cause of the injury?	All roles	All roles	

- NOTE The view and edit permissions you set on this page are applied to the form only when in this specific step of the form flow. Step access does not override question access given in the template. If you cannot view a question using the access given in the template, you cannot view it when step access is applied.
- 14. On the Button details page, select what form flow button is used to advance to the next step.

NOTE You can also select None.

- 15. Select whether this button completes the form flow.
- 16. Click Save.

4.9.3 Re-enable form flow

You can let users re-enable a form flow of a completed event by selecting a form flow, and then selecting the **Re-enable form flow on completed events** check box in the side panel.

When a user re-enables a form flow, they can move it back to the step of their choice. All step data is saved from previously completing the form flow unless the user changes an answer in a way that leads to different questions based on logic. Only the selected form flow is re-enabled, not all form flows associated with the template. If a re-enabled form flow leads to another form flow that is not re-enabled, the user cannot see the other form flow.

NOTE Users must have permission to edit completed events to re-enable a form flow.

4.10 TEMPLATE HISTORY

The History tab provides a listing by date of changes made to a form or task.

Not all changes made to a template are shown in the history.

	Form builder										
Module landir	g >	Templates manager >	Form builder								
Accident F	orm			BUILI	D PROPERTIES	HISTORY				\bigcirc	
Change type		Question/Option	Section	Old value	New value	Area 📃	Version	Change date L	Changed by

	Published				0/09/2019 9:45 AM

For auditing purposes and to meet ISO requirements changes to both Form and Task templates are recorded with date and version history.

4.10 Step by Step **1** — View User History on Templates

- 1. From module landing page, select **Templates Manager**, and then determine if you need to look at an event or a task.
- 2. Switch the toggle in the proper direction, in this case, Forms.

- 3. Click on your preferred form.
- 4. Open the **History** tab.

INSPECTION AND TEST PLANS

4.11 INSPECTION AND TEST PLANS OVERVIEW

Inspection and Test Plans (ITP) is a feature that can be activated for templates to let you gather ITP information for a project. They can also integrate with InEight Plan. You can collect information to understand where you stand from a project perspective. At the organization level, administrators have the option to enable Inspection and Test plans for any given module.

At the project level, with the applicable permissions, you can enable Inspection and Test plans on a project by project basis.

4.12 CONFIGURE ITPS AT THE ORGANIZATION LEVEL

You can enable and disable Inspection and Test plans for a given module at the organization level in Product Settings.

To enable and disable ITPs, in the Organizations home page, click **Settings** on the left navigation panel, and then click the **Compliance** or **Completions**icon.

Use the toggles to enable and disable ITPs for the module. When you enable ITPs, its related functions will show throughout the module. ITPs are disabled by default.

	Module management Template integrations			
Ð				(

2				

4.12.1 Configure project settings ITP permissions in Roles

When Inspection and Test Plans are enabled for a given module, you can then enable Project Settings ITP permissions in Roles.

Add role			
• Name	Description		
MODULE EVENTS ROLES/USERS	TEMPLATES PROJECT SETTINGS	Manage Project User Groups	*
Edit header template	Create and edit Inspection and Test Plans Edit header template	Create and edit User groups	
Make this role read only			•

You can select the following options:

- Manage Project Inspection and Test Plans When selected, this option includes Create and edit Inspection and Test Plans and Edit header template options.
- Create and edit Inspection and Test Plans Lets you create and edit ITPs at the organization level.
- Edit header template Lets you access and edit ITP header templates.

4.12.2 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

4.13 CONFIGURE ITPS AT THE PROJECT LEVEL

In the project's module settings > **Project Settings** tab, you can enable Inspection & Test Plans for the project to create and manage ITPs. This will also enable the **Open Inspection and Test Plans** link to open the Inspection and Test Plans page where you oversee and manage ITPs.

Iodule summary Categories Types Classifications Statuses Email templates Roles User assignments Project Settings	•	Templates

To integrate ITPs with InEight Plan, enable the **Integrate with Plan components** toggle. This will allow you to create templates with ITP headers and associate components with events. For more information see the Header templates topic.

4.13.1 Considerations

- To integrate with Plan, you must enable **ITP mapping between Compliance and Plan** option at the project level in InEight Plan settings.
- You must have Level 3 Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

4.14 CREATE ITPS AT THE ORGANIZATION LEVEL

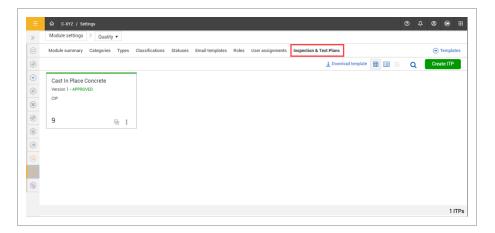

After Inspection and Test Plans have been enabled for the module, you can create and manage ITPs at the organization level. Create new ITPs manually or import them using a template. The template is available to download from the **Download template** link.

Navigate to Inspection and Test Plans at the organization level

1. From your organization home page click **Settings**, and then select **Compliance** or **Completions**. The Module management page shows the available modules under Product Settings.

NOTE The Inspection and Test Plans toggle must be enabled for the module.

- 2. In the Product Settings landing page select the **Module Settings** tab, and then select a module. The Module settings landing page shows.
- 3. Select Inspection & Test Plans.

Create an Inspection and Test Plan

1. Click Create ITP. The create ITP dialog box opens.

* ITP name	
I	
Account code	
Assign account code	
Discipline	
Select one	•
Description	

2. Enter the ITP information, and then click **Save**.

Import ITP

- 1. In the Inspection & Test Plans page, click the **Download template** link. The Inspection and Test Plan Import Template is downloaded to your downloads folder.
- 2. Fill in the ITP information. Included in the template are the Instruction and Example sheets.
- 3. Click **Create ITP**. The Create ITP dialog box shows.
- 4. Enter the required fields, and then click Select file to Import.
- 5. Select the ITP template, and then click **Open**. The ITPs will show in the Inspection & Test Plan page.

4.14.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

4.15 CREATE ITPS AT THE PROJECT LEVEL

At the project level, you can create new ITPs manually from scratch, copy ITPs created at the organization level, or import them using a template. The template is available to download from the Download template button.

Navigate to Inspection and Test Plans at the project level

1. From your project home page click **Settings**, and then select the **Compliance** or **Completions** icon. The Module management page shows the available modules under Product Settings.

The Inspection and Test Plans toggle must be enabled for the module.

- 2. In the Product Settings landing page select the **Module Settings** tab, and then select a module. The Module settings landing page shows.
- 3. Select the Project settings tab, and then click the **Open Inspection and Test Plans** link. The Inspection & Test Plans page opens.

	Quality > Design to atting a							
»	Quality > Project settings

B	9 🖷 🗄	0	:					
<u>ی</u>								
E								

Manually create a new ITP

- 1. In the Inspection & Test Plans page, click Create ITP. The Create ITP dialog box shows.
- 2. Enter the ITP information, and then click **Save**.

Copy ITP from organization

- 1. Click **Copy ITPs from Org**. The Copy ITPs from Org dialog box opens.
- 2. Select ITPs from the list and then click **Copy**. You can select up to 20 ITPs at a time.
- 3. The ITPs now show in draft mode in your projects Inspection & Test Plans page.

Import ITPs

- 1. In the Inspection & Test Plans page, click the **Download template** link. The Inspection and Test Plan Import Template is downloaded to the downloads folder.
- 2. Fill in the ITP information.

NOTE Included in the template are the Instruction and Example sheets.

- 3. Click **Create ITP**. The Create ITP dialog box shows.
- 4. Enter the required fields, and then click **Select file to Import**.
- 5. Select the ITP template, and then click **Open**. The ITPs will show in the Inspection & Test Plan page.

4.15.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

HEADERS

4.16 HEADERS OVERVIEW

You can create Inspection and Test Plan and Project Structure templates headers in the Headers tab. When you enable the project's header feature in Project settings, the headers are automatically created. The header templates ensures that the data captured remains consistent through the use of question types.

4.17 ITP HEADER TEMPLATE

When you enable Inspection & Test Plans for the project, you can also enable the ability for the form to seamlessly integrate InEight Plan components using a template header. This ensures that component data captured from Plan remains consistent through the use of question types.

To do this, enable the **Integrate with Plan components** toggle. This will enable the Go to Header Templates link to access the Headers page.

Mo	dule settings >> Quality •

4.18 PROJECT STRUCTURE HEADER TEMPLATE

You can use a Project structure template header to seamlessly integrate with InEight Platform master data. The project structure configured in Platform is shown in the header template. This ensures data consistency and provides a single source for InEight Platform data.

To do this, enable the **Project Structure toggle** in Project settings. This will enable the **Go to Header Templates** link to access the Headers page. For more information, see **Project structure** under **Project level settings**.

In the Headers page, you can oversee and manage Project Structure Headers for projects.

	Steel Structure Training Job J Settings Templates manager Forms Tasks Headers	105091 / Com	pletions	0	¢	8	6

						3 Hea	aders	

Under Organization, you can view the list of projects that have the Project Structure processes enabled. Select a project to view the associated template headers. You can click a project structure header to open and manage it.

To use a Project structure header in a template, you must associate it to the template. Click **Manage associations** to associate the template. For more information, see <u>Manage associations</u>.

4.18.1 Considerations

You must have Level 3 – Account Admin permissions in InEight Platform or a Compliance or Completions role with the applicable permissions.

To integrate Project Structure header with Platform, all Project Structure values and definitions for your project must first be made in InEight Platform.

4.18.2 Steps

To navigate to Project settings, see steps to navigate to project level settings in <u>Settings overview</u>, and then click the **Project settings** tab. Click the **Go to Header Templates** link.

4.19 DYNAMIC HEADERS TOGGLE

ITP and Project Structure dynamic template headers are used to enhance your template forms. You can enable and disable the use of header templates created for your project using the **Enable dynamic headers?** toggle feature in your template properties.

	BUILD PROPERTIES FORM FLOWS HISTORY	C 🗇

AUTOMAPPING

5.1 OVERVIEW

Automapping is a feature that lets you create a series of events in bulk for project structure levels (nodes) or components associated with inspection and test plans. Automapping is enabled on a project-by-project basis.

Leveraging map values, you can associate them with project structure nodes and templates. This lets the mapping of templates and the quantities for each template to be created for each project structure level or component value, eliminating having to manually create and schedule processes.

When enabled, you can configure automapping in:

• Automapping setup - Create map values to associate to the project structure. The map values serve as tags to associate them to the project structure node levels and templates.

Ð	\otimes	258 Map project structure	👷 Map templates 🎁 🧊 🦓 🗸 🌒 Cancel 🛛 Save
	Map value name	Ŧ	Description T

When you run the selected automappings, you will receive a dialog box to confirm the creation of the activities. An email confirmation will be sent to you with an Excel file showing a summary of the new forms.

The new events show in the Events list in a scheduled status where you can add an event date, and a reporter. As soon as a reporter and event date are provided, the user will be notified.

You can view events associated to the project structure in Events > **Project structure**.

5.1.1 Considerations

- Project structure or Integrate with Plan components must be enabled to use the Automapping feature. For more information, see <u>Project level settings</u>.
- Automapping is enabled at the project level in Project settings. For more information, see Automapping in <u>Project level settings</u>.

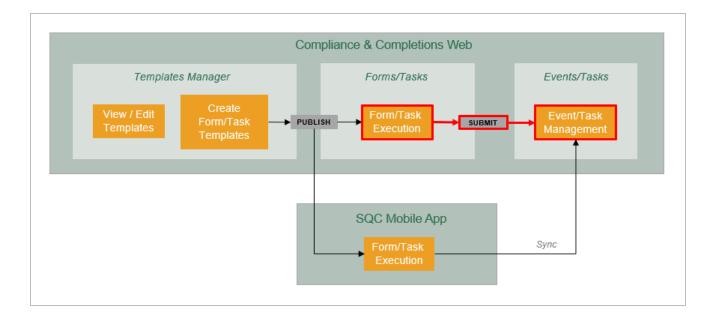

FORM AND TASK EXECUTION AND MANAGEMENT (WEB)

InEight Inc. | Release 23.10

6.1 FORMS AND TASKS

6.1.1 Launching a Form or Task

You can launch a form or task by navigating to the Completions landing page, and then choosing a category in the Forms or Tasks window.

Steel Structure Job ompliance > Safety								0 ¢ ⁴ ® 🖲
ks								
events	To do list			C	October			
asks	Sun 10	Mon 11	Tue 12	w 1	^{led} 3	^{тни} 14	^{Fri} 15	Sat 16
ninistration								
lates manager								
assignments 1gs								
e notifications							Overdue event	s: 0 Overdue tasks: 0
	Forms		~	Schedule form	Tasks			
	Safety (Confidential)			-	Medical (Confidentia	D		
	Search forms			Q	Search tasks	7		
		No items found					No items found	
		No items round					No items lound	

In the Forms and Tasks windows you can select the Favorites drop-down list, and then a category associated with the module needs to be selected. A category contains the forms or tasks that are associated with Compliance.

TIP

If you do not see a category that applies, it means you do not have Compliance assignments to that category for that project.

6.1 Step by Step 1 — Launch a Form

- 1. Open the InEight project portfolio web application.
- 2. Navigate to the **Compliance** Landing page module.
- 3. Select the **Safety** module card.

Safety		
Created Jun 2	5,2018 04:05 PM Service A	ccount
	track and manage safety cesses update	related
	TASKS	ត្រា

4. On the Module landing page find the Forms box, and then select a category from the dropdown menu. · A list of forms appears on the screen associated to the category selected

Forms	🗂 Schedule form
Inspections	•
Search forms	Q
Leader Safety Walk	
	TOTAL: 1

5. Select a form.

A new window opens showing the selected form

						3	18
				8		Cancel	Save
AREA / TASK OBSERVED					 		
ASK / CONSIDER THE FOLLOWING QUESTIONS:							
STEP 1: Stop and observe work, Ensure it is safe to enter by ask	ing *Can I enter your workspace?*						
STEP 2: Introduce yourself if you are not know to the person. "Hi,	I'm, the General Manager of						
STEP 2. HINGOUS YOURSEN IN YOU are not know to the person. "Hi,							
STEP 2: Introduce yoursell it you are not know to the person. I'm, Date & Time			* People Observved				
	8	Ø	* People Observved Select one				۵
Date & Time		Ø					۵

You can close the form by selecting Cancel on the top right corner

NOTE Selecting Cancel results in the loss of any data you have entered since the last time you saved. The system does not autosave your work.

TIP Launching a Task follows a very similar process. After selecting the appropriate tile (Safety in this case), you select the Task from the Task dialogue, selecting the appropriate category and then task.

Finalize Safety Walk	k Process (hn)	

6.2 FILLING OUT A FORM AND TASK - WEB

After selecting the desired form from the Module landing page, it is now time to fill out the form and submit it. A task might also need to be completed.

There are many types of question formats which can include different types of fields: free text fields, calendar fields, time drop-downs, and more. Short free text fields have a 250 character limit. Long free text fields have a 4000 character limit.

NOTE Form and task types can vary depending on the module type, and what is required to complete prior to submitting. The below overview is only an example of what a typical form might require.

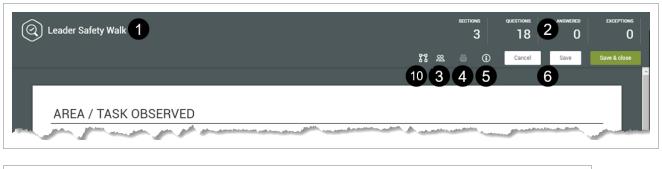

Overview – Forms or Tasks Page

	Title	Description
1	Form name	Name of the template.
2	Quick info	The number of sections, questions, questions answered, and answers considered exceptions. If you click the number of sections or exceptions, a table of contents opens for easy navigation.
3	User groups	Select what user groups have access to this form or task. This button is available only at the project level.

Overview – Forms or Tasks Page (continued)

	Title	Description
4	Print	Print a PDF of the form or task.
5	Information	The number of questions that have been answered. It also shows you several details pertaining to the form or task.
6	Cancel and Save	Cancels the form or task. Any changes made since the last time you saved are lost. Saves the form or task in its current state, and you can continue to fill it out if necessary. You can also save and close to exit the form. For tasks, you can choose to save and start a new task.
7	Question types	Various ways of asking questions within a form or task. Examples include: • Attachments • Choice • Date-time • Form button • Form Flow • People picker
8	Signature block	Some forms or tasks might require a user to sign off prior to submitting it.
9	Button	The outcome of clicking on a form or task button vary depending on the button's configuration. The name of the button is defined by the administrator who created it (for example, Submit the form).
10	View active form flow	Lets you view which step and status in the form flow you are in. This only shows active after a form flow has started. If a form flow has not been started, the option is disabled.

Form example:

Supervisor's name		Supervisor's Signature		
Select one		1		
7		× 8		
Duration in hours	Start Time		Stop Time	
	Hour.Minute	Ø	Hour:Minute	0
9 pprove for Work				

Task example:

Corrective Action			0 0
		æ 👵 🛈	Cancel Save Save & c
Corrective Action			
* Task title			
			(250 characters remaining)
			fann ann an tra i chuan mille
* Description			
			(4000 characters remaining)
Attach any documents, files or photographs			
	(+)		

6.2.1 Header Information

Most forms contain basic identifying information such as date, time, and location of the event, or free text fields asking for details about the event. The header information is higher-level material needed to complete a form. Not all forms have header information, however, as this is determined by the person

creating the template of the form. Filling out the required information accurately is important for workflow and reporting reasons.

Tasks might also have header information as, at minimum, the Description, Responsible party and Due date are programmed fields.

Description of the accident	* Date of incident		Time the incident occurre	d
(200 characters remain	month/day/year	#	hours:minutes	e
Specific location where the accident occurre	d			
				(4000 characters remaining

6.2.2 Copy a Section

Depending on how the form or task template is set up, you might be able to copy a section. If the copy option is enabled, use the Copy section button in the section header to copy the section below the current section.

- **NOTE** The Copy section button might have a different name, depending on how the form or task template was set up.
- NOTE On the web, the Copy section button is shown in both the upper-right and lower-right of the header.

You can also click the **Remove** icon to remove a copied section.

E Copy section
Copy section

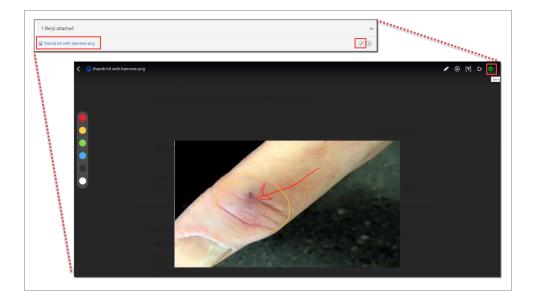

6.2.3 Attachments

Some forms or tasks might include an option to include attachments such as photos. You can also include any annotations to describe the attachment in greater detail. Annotations help clarify what the photo represents.

Select files or drag and drop	

For example, you can include an attachment photo for an incident showing an injured thumb. After you click **Save**, it is saved in the form or task. You can also annotate the photo by drawing a red arrow to the specific injured mark on the thumb or adding descriptive text.

On mobile devices, a time stamp updates when edits are made.

If integration with InEight Document is set up, you can attach supporting documents from the Document application. Click **Select files or drag and drop**, and then click **InEight Document** in the dialog box.

Select files from Local system	×
InEight Document 🕸	
Select files or drag and drop	

A new window opens where you can sign into Document, and then enter search criteria. Click **Search**. Results are shown according to your Document user permissions. Select one or more documents, and then click **OK**.

6.2.4 Form and Task Details

The form might require you to fill out additional details. For example, for an incident-related form you may need to determine if the incident required any first aid or if it was a near miss.

 First aid Lost time Restricted duty Other rec. Non-work related Near miss Auto / Equipment Utility strike Fatality What is the job type of the injured party? What was the cause of the injury? What is the type of injury?		* Did 1	the injured party	receive any kind of medical treatr	nent?
What is the job type of the injured party? What was the cause of the injury? What is the type of injury?	ne ted duty tc. ork related iss Equipment trike	Ŭ	5		
	he job type of the injured party?	What was the cause of the inju	ury?	What is the type of injury?	
Select one	~	Select one	~	Select one	

Other form questions might include determining if the injured party received any medical attention, or what caused the injury.

Incident classification		* Did the injured p	party receive any kind of medical treat	tment?
🔿 First aid		🔿 Yes		
O Lost time		O No

Select one	Select one	~	Select one	
What was the injured party doing just before	the incident ecourred?			

TIP Tasks might also require you to fill out additional details.

6.2.5 Smart Forms and Tasks

Smart forms and smart tasks generate additional questions based on how the original question was answered. For example, the below image is showing that only if the question "Was anyone injured during the accident" is answered Yes, is the following question, "Did the injured party receive any kind of medical treatment?," shown.

id the injured party receive any kind of med Show this question when the fo	lowing question is answered:			
Was anyone injured during this inciden	? 🔻	is	Yes	· 8
Select a question			Select a response	

6.2.6 Form Within a Form or Task

There might be a need to open a new form from within the existing form or task you are working in. For example, while working on an Incident form you might need to start a Worker's compensation claim report.

CLOSU If you believe that a claim is required on this incident, please start the process by clicking h ere	
Click here to start a workers comp claim report (1)	

By selecting the Workmans comp claim report form button, a new form generates, and you follow the steps of that form to fill it out. After filling out the required information, you submit the form, which returns you to the original form or task you were working in.

When you click a form or task button, the status of the current form or task might change, depending on how it is set up by your administrator.

					ë (Cancel	Save	Save

⊖ Yes			\odot					
○ No			\otimes					
Submit for review								
			INEIGHT®					

6.2.7 Form Flows

When the form you are filling out has a form flow associated with it, there are special buttons to complete each step in the flow. These form flow buttons appear similar to other form buttons but have an arrow icon next to them.

Form flow buttons that move the flow to the next step have a right arrow. Form flow buttons with a left arrow revert to a previous step.

Who was present at the incident?
Select one

When you click a form flow button after filling out all mandatory information, the form saves and closes.

Some form flows can be re-enabled after an event is completed, depending on the form flow's setup. Click the **Re-enable form flow** button in the upper-right of the page, if it is shown. When you re-enable a form flow, you can move it back to the step of your choice. All step data is saved from previously completing the form flow unless you change an answer in a way that leads to different questions based on logic.

If you re-enable a form flow, only the selected form flow is re-enabled, not all form flows associated with the template. If a re-enabled form flow leads to another form flow that is not re-enabled, you cannot see the other form flow.

NOTE You must have permission to edit completed events to re-enable a form flow.

6.2.8 View Active Form Flow

When you open an event from the Events page, and the event has a form flow that has been started, you can click the View active form flow icon at the top of the page. The Active Form Flow dialog box opens.

	sections	QUESTIONS	answered 0	EXCEPTIONS 0
c 11	- î	Cancel	Save	Save & close

At the top of the dialog box is the name and description of the form flow and the number of steps. Below them, each step is shown with its status and responsible party.

Active Form	Flow		×
			<u>^</u>
FORM FLOW	Testing		STEPS 3
STEP 1	F1 Original Reporter	СОМ	PLETED
	(Current Step)	\downarrow	
STEP 2	F2 Role	1 DAYS IN PR	ROGRESS
		Ļ	_
STEP 3	Completed	NOT S	STARTED
			CLOSE

NOTE If a form flow is not started, this option is disabled.

6.2.9 GPS Questions

A GPS question lets you provide your location by clicking **GPS** or by entering your coordinates directly in the fields. You can also click **Clear GPS** to remove information if you need to enter a different location.

NOTE If you enter GPS coordinates automatically, you cannot manually edit the coordinates.

6.2.10 Complete a Form or Task

For more information on how to save and submit a form or task, see <u>Complete a Form or Task</u>.

6.2 Step by Step 1 — Fill Out a Form

1. From the Compliance landing page, select a card module, Safety in this case.

- 2. From the Module landing page, select a category from the drop-down menu under Forms.
- 3. Under the category, select a form.

4. Complete all fields in the form, paying particular attention to those with an asterisk, which are mandatory fields, as they preclude you from moving ahead.

Has the incident been fully investigated and completed?	Reconstruction photos were added to the incident
Yes No	\bigotimes

Some items require free-form data entry such as Description of the accident. Others require selecting a time or date.

Accident Information

Description of the accident	* Date of incident
	month/day/year
(200 characters remaining)	

Other question types may require attaching documents. Use the annotation feature to add text or drawing to an image. In this case, you could draw an arrow showing the direct location of an injury.

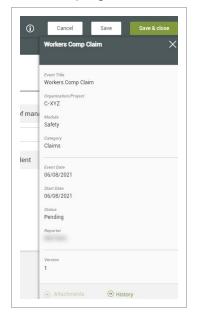

Some questions require selecting from radio buttons or icon type questions.

Has the incident been fully investigated and completed?	Reconstruction photos were added to the incident
 Yes No 	\otimes

5. To update the photograph's annotations, Select the Save check mark.

6. On the top right of the form, select the **Information** button to see form information.

7. Forms most often have a button at the end to move the form along in its process. In this case, the **Click here to start a workers comp claim report** button initiates the form within a form feature, where the system branches to another form, in this case the Workers Comp claim form.

CLOSURE OF INVESTIGATION

Click here to sta	art a workers comp claim report
Signature of Sa	afety Manager
Close and comp	plete this incident
NOTE	The process for completing a task is very similar to filling out a form.

The process is similar whether checking the status of a form or task.

6.3 COMPLETE A FORM OR TASK ON THE WEB

There are several ways to finish filling out a form or task depending on how it is set up by your administrator and what the next steps are.

6.3.1 Save a form or task

There might be times when you do not have enough time to complete a form or task in its entirety. When you do not have enough time to complete a form or task, or not all information about the event is readily available, you can save your work and continue or save and close and come back later to complete and submit it.

If you are filling out a task and want to start a new task immediately after saving the current task, click the **Save & close drop-down** button, and then select **Save and start new task**.

6.3.2 Assign a task

As part of filling out a task, you might have to assign it to someone else to complete a portion of it. To assign a task, click the **Assign** button. If you want to start a new task immediately after assigning the current task, click **Assign and start new task**.

6.3.3 Submit a form or task

When you have all the needed information in the form or task, you are ready to submit it or send for manager review. This is the end of what you need to complete. An email notification, if applied, is typically sent to the manager.

NOTE You can use the Button question type to facilitate a simple workflow outside of using the form flow feature.

As part of closing out the form or task, you might need to sign it, and the button varies depending on what type of form or task it is.

CLOSURE OF INVESTIGATION
Click here to start a workers comp claim report ()

NOTE If there are mandatory questions on the form or task, you are not able to submit it until they are answered.

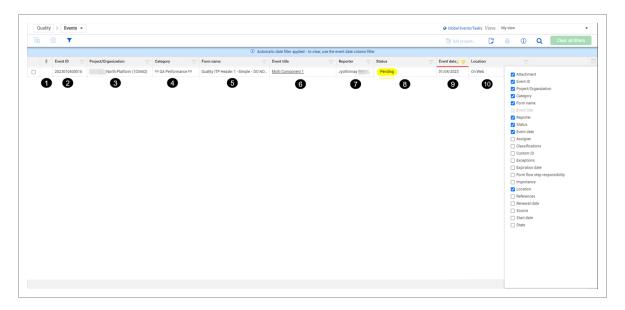

TIP The Edit button is only visible to those with authority to edit forms.

6.4 EVENT AND TASK MANAGEMENT

A Compliance event is an occurrence that has already happened; it therefore refers to forms that have already been filled out. Because events are part of a workflow, you can add more information to events, review existing data in the event, or move the event through the workflow.

The Events page shows a repository of forms in various statuses such as pending, with claims manager, manager review, and complete. The Task page is also a repository of forms that provides the same functionality as the Events.

The following are common column headings and their descriptions:

	Title	Description
1	Attachment	Indicates whether an event or task has attachments. Click the icon to see the attachments.
2	Event or Task ID	The unique value assigned to each event or task.
3	Project/Organization	The project or organization associated with the event or task.
4	Category	The category associated with the event or task. It is specific per module and defined by the organization. Allows the module to be partitioned into smaller areas and assigned permissions.
5	Form or Task name	The name of the form or task template.

(continued)

	Title	Description
6	Event or Task title	The title given to the event or task by the user or generated by the system.
7	Reporter or Responsible party	For events, the user who initially submitted the form. For tasks, the responsible individual.
8	Event date or Due date	Date the event occurred or the due date of a task.
9	Status	Four default statuses are provided, Complete, Pending, Scheduled, and Canceled. Admins can create sub statuses under each that best align with their business processes.
10	Location	Shows whether the event or task location is On web or On mobile. When an event or task is scheduled and synced to a mobile device, a lock shows next to the Task title.

You can access events or tasks by going to the module landing page, and then selecting **All events** or **All tasks**.

The event ID, Event title are shown on the Events page. The Event status is also shown, and changes based on the state of the event.

0	Event ID	Project/Organization	Category	Form name	Event title	Reporter	Event date 🛔 👳	Status	Location
)	20230112	Platform ()	Category A -	Quality ITP Header 2	Quality ITP Header 2	Mahesh	01/12/2023	Pending	On Web

The Tasks page also shows columns such as Task ID, Project/Organization, Category, and Status. Columns unique to the Tasks page include Task name, Responsible party, and Due date. Tasks automatically become overdue when the assigned due date expires. The tasks page shows a visual indication of overdue states. Sorting and filtering capability in the lists lets you to quickly associate tasks to individuals, categories, status, etc.

Q	uality	> Tasks -					•	Global Events/Task	s View:	My view			•

NOTE When a task is assigned, the responsible party receives an email with a link to complete the task.

NOTE Sorting or filtering by the Assigner and/or Responsible party, may be helpful.

6.4 Step by Step 1 - Add additional columns to the list of all events or all tasks

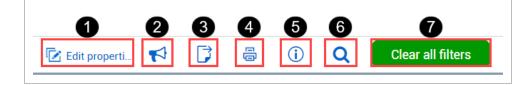

- 1. In the module landing page click **All events** or **All tasks**.
- 2. Click the **Column chooser** icon.
- 3. Select Assigner and Responsible party.

You are now able to sort or filter these columns.

6.4.1 Additional event or task functions

You can use the following functions in the All events and All Tasks pages:

	lcon	Description
1	Edit properties	Edit properties of one or many selected events or tasks. All the selected events or tasks must be from the same template and you must have permission to edit them.
2	Notifications	Send notifications with messages to specific users, and roles for the

	lcon	Description
		specific project. This is available only at the project level.
3	Export events or tasks	Export data from the Events or Tasks list to Excel, with an email generated once the file export is completed.
4	Print	Print a PDF report of the selected event or task. The ability to print is based on template configuration.
5	Information	Open a slide-out panel to the right that outlines data about a specific EventID or TaskID. You can also see the history of changes to the event or task.
6	Search	Open a slide-out panel to search all columns in your view for specific terms.
7	Clear all filters	Revert the listing to its unfiltered state if filters have been used.

6.4.1.1 Edit properties

6.4 Step by Step 2 — Edit an event or task properties

- 1. In the All events or All tasks list page, select events or tasks by clicking the check boxes.
- 2. Click the Edit properties button.

The Edit properties dialog box opens.

- 4. Click Send when complete.

6.4.1.3 Export events and tasks

6.4 Step by Step 4 — Export events or tasks

1. In the All events or All tasks list page, click the Export icon.

The Export dialog box opens.

2. Select **Export** to export all items.

The export contains the filtered grid set that shows in your view. You can also export selected events or tasks by checking each item's check box, and then clicking the Export icon.

6.4.1.4 Print

You can print a report of an event or task that has been enabled to be printed. Print functionality can be enabled in the template's Properties tab. See <u>Template Properties</u> for more information.

6.4 Step by Step 5 — Print an event or task

- 1. In the All events or All tasks list page, select an event or task.
- 2. Click the **Print** icon to print the event or task.

	\otimes								ę	🖄 Edit properti	٦	-	()	Q	Clear all filters

	Report a Safety Incident_2021080900		Incidents-eng		08/09/2021	2021080900001	Report a Safety Incident						Per	iding	

A PDF of the report will open for the selected item in a new browser tab.

NOTE The Print feature only works for one event or task at a time. To print in bulk, you can use InEight Report.

6.4.1.5 Form and task information

You can view data, references, and history changes of an event or task and edit their properties in the Form information slide-out panel.

6.4 Step by Step 6 — Navigate to event or task information slide-out

1. In the **All events** or **All tasks** list page select an event or task, and then click the **Form information** icon.

The Form information slide-out opens where you can view the form data.

2. Click Edit properties.

The editable fields show so you can edit them.

3. After editing any fields, click **Save**.

Additional Form information panel options

You can also view attachments, references, and form history using the buttons at the bottom of the slide-out.

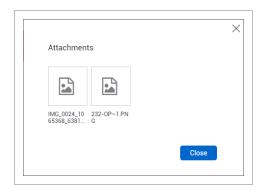

Attachments

You can view and edit attachments other events and tasks referenced in a certain event or task.

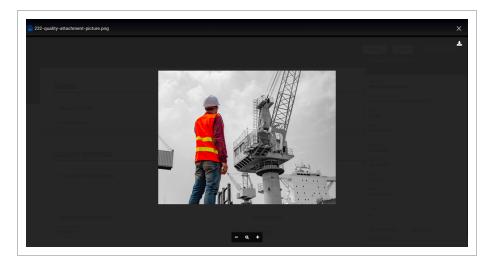

6.4 Step by Step 7 — View and download attachments

1. In the Form information slide-out, click Attachments.

The attachments dialog box opens.

2. Click an attachment to view.

- 3. You can zoom in or out using the **Zoom** icons.
- 4. You can click the **Download** icon in the upper right to download the attachment to your computer.
- 5. To close the attachment, click the **Close** icon in the upper right.
- 6. Click **Close** to close the Attachments dialog box.

NOTE The Attachments button is greyed out when there are no attachments in the form.

NOTE You can also view an event or task's attachments by clicking the attachment icon in the Attachment column on the Events or Tasks pages.

References

You can view other events and tasks referenced in a certain event or task.

6.4 Step by Step 8 — View and edit references

1. In the Form information slide-out, click **References**.

The References dialog box opens where you can view and add references.

F ×	EVENTS	TASKS							(Add References

The Reference type column can have the following values:

- Associated form Started from a form or task button from within the form or task.
- Internal reference Associated with a reference question.
- External reference Associated by using the Add References button in the reference dialog box.

History for events and tasks

You can view the history of changes for events or tasks. You can sort and filter the list view.

6.4 Step by Step 9 — View form history

1. In the Form information slide-out, click **History**.

The history page opens where you can view changes made to the event or task.

hange type	Question/Option	Section	Old value	New value	Change date	Changed by
nswer	Did the tour result in a next step?	TOUR INFORMATION		No, there is no next step needed.	03/27/2023 11:21 AM	Karen

2. Click **Close** when done viewing.

NOTE You must have permission to view the History dialog box.

6.4.1.6 Delete an event or task

To delete an event or task, select events or tasks, and then click the **Delete** icon.

Environmental > Events -								
Delete form								
	Event title	0	Category					
	Renew WWDP - Janitorial	0	Matrix					
	MB 535 - Rental Barge Weekly Inspec		Forms					

NOTE

Your role must contain permission to delete.

6.4.1.7 Copy an event or task

The ability to copy a task, or an event, along with its associated tasks and attachments, is useful when you have many tasks and attachments that mimic the last event, such as an environmental permit

event. You can copy one event at a time or multiple tasks at the same time.

6.4 Step by Step 10 — Copy event or task

1. In the **All events** or **All tasks** list page select an event or tasks to be copied, and then click the **Copy form** icon.

E	nvironmental > Events -			
Ē	।⊗ ▼			
	Event title	0	Category	
	Above Ground Storage Tank Inspec		Forms	

When you copy one or multiple items from All tasks, the copied tasks are created with *COPY OF* in front of the task title.

When you copy an event from All events, the Copy event page opens to edit form details, attachments, and tasks.

	Copy event			
1 Details 2 Attachments 3 Tasks			Cano	cel Next
Details				
Event title	• Organizati	on/Project		
Copy of Above Ground Storage T	ank Inspection_20210 30 Crossin	g	*	
* Category				
Forms	•			
• Reporter	Event date			
	▼ 03/29/20	13	m	

- 2. In the Details page, you can edit the copied event, and then click Next.
- 3. In the Attachments page, you can uncheck any existing attachments to remove them, and then click **Next**.
- 4. In the Tasks page, you can uncheck any existing tasks to remove them, and then click **Next**.
- 5. Click **Copy** to create a copy of the form.

6.4.1.8 Query builder

The Query builder feature can be used on event and task list pages. It provides a more granular filtering and querying option for events and tasks. These filtering options are an alternative to the options found in the grid page columns.

6.4 Step by Step 11 — Using the query builder

1. Click the Query Builder icon.

The query builder dialog box shows.

Environmental > Events -		
₩ ⊗ ▼		
Event title 📃 🖗	Category	
Safety > Events -		
Ē ⊗ Ţ		
Queries		\times
⊕ 🗹 ⊗ 🧠	Search	Q
My Query		*
Shared queries		
		¥
Clear	Cancel	Update Results

In the query builder you can add, edit, delete, and share queries. Your saved queries are listed under the My Query menu, and your shared queries are listed under the Shared queries menu.

NOTE Queries can only be shared with users in the same project.

- 2. Click the **Add** icon to add a new query, and then enter the conditions to your query.
- 3. Click Apply.

You can then use the Reset, Cancel, and Save Query buttons at the bottom of the query window. If you update an existing query, you can save the new query using the Save Query As

button.

Query builder column condition choices are dependent on events or tasks. For example, if you select Events, you see column choices that are related to events.

		Column		Operator		Value	
Ð	And	- Select one -	•	- Select one -	•		\otimes
Ð	And	- Select one -	•	- Select one -	•		\otimes
Ð	And	- Select one -	•	- Select one -	•		\otimes
Ð	And	- Select one -	•	- Select one -	•		\otimes
Ð	And	- Select one -	•	- Select one -	•		\otimes
Ð	And	- Select one -	•	- Select one -	•		\otimes
Ð	And	- Select one -	•	- Select one -	•		\otimes

NOTE You can enter up to seven conditions in a query.

6.4.1.9 Views

For more information on how to save and send views and use the Global Events/Tasks option, see Event and Task Views.

6.4.2 Managing events and tasks

6.4 Step by Step 12 – Manage an event

- 1. From the Compliance landing page, select a **module** card.
- 2. Select the All events link.

All events and tasks links are shown under Links in the upper left side of the page.

Links	
All events	
All tasks	

3. On the Events page, select an event or task that requires additional review based on business process requirements. For example, an event with a pending status.

Event ID	Project/Organizati	Category	Form name	Event title	Reporter	Event date	Status	
2019101100004	S100000 - PKS Inc	Incident	Project Manager Safe	Johnson Branch facili	Karen Loftus	10/09/2019	Manager Review	

- 4. Advance the event or task to the next form flow step, as required.
- 5. The status of the event will update depending on how your form workflow is setup.

Managing tasks follow a very similar process, as shown below.

6.4 Step by Step 13 – Manage Tasks

1. Select the **All Tasks** link on the left side of the page.

Links
All events
All tasks

- 2. Select a task by clicking on a **Task title**.
- 3. Advance the task to the next form flow step, as required.

6.4.2.10 Monitor due dates, overdue states and statuses

You can monitor the events or tasks due dates, states, and status, and their adherence.

6.4 Step by Step 14 — View due dates, overdue states and statuses

- From a module landing page, click All tasks.
 You can also go to All events.
- 2. In the tasks page, find the Due date (or Event date for events), Status, and State columns.

Click the **Column chooser** icon to add the columns if they are not in the view.

		State	= 🗆
~	Attachme	ent	
~	Task Id		
~	Project/0	rganization	
~	Category		
 Image: A start of the start of	Task nam	ne	
	Task title

	Classifica	ations	
	Custom I	D	
	Exceptior	ıs	
	Expiration	n date	
	Importan	ce	
	Location		
	Reference	es	
	Renewal	date	
	Source		
	Start date	e	
	State		

3. Click the **Column chooser** again to close.

An overdue event or task will make the Due date and State columns turn red. An overdue email

is also automatically triggered.

Due date	- Status	State
02/01/2023	Scheduled	Overdue
02/23/2023	Scheduled	In Process
03/01/2023	Scheduled	In Process
02/17/2023	Scheduled	In Process
01/31/2023	Scheduled	Overdue
02/24/2023	Scheduled	In Process
02/28/2023	Scheduled	In Process
02/08/2023	Scheduled	Overdue
02/08/2023	Scheduled	Overdue
02/09/2023	Pending	Saved
03/07/2023	Scheduled	In Process
02/07/2023	Pending	Saved
01/25/2023	Pending	Saved

NOTE The State column changes to Overdue after the due date.

6.4.2.11 Monitor form flow status

When an event has an active form flow, you can click its Status column to open a dialog box with detailed information about the current status of the form flow.

The current status box has the following areas:

URRENT STEP Step 2	1. Form Initiated Start date: 10/31/2018	2. Quality Review Due date: 11/13/2018	3. Client Concurrence Due date: 11/19/2018	4. Close and complete workflow Due date: 11/21/2018
Quality Review	Abby Carter Original Reporter	Karl Jensen Site Auditor	Amy Peterson Project Engineer	Sarah Montgomery Administrator
2 Pending		Jimmy Crammer Site Auditor	Jeff Singleton Project Engineer	Steven Taylor Administrator
In Process		Jennifer Bard Site Auditor	Donald Thorton Project Engineer	Monica Bremmer Administrator
AYS UNTIL OVERDUE		Michael Lowe Site Auditor		Jamie Conner Administrator
4 5		Sondra Keppler Site Auditor	1	
5 8		Louis Brown Site Auditor		
51IMATED COMPLETION DATE		Mary Johansen Site Auditor		

	Description
1	Current step.
2	Current status.
3	Current state.

- 4 Number of days until the form flow step becomes overdue.
- 5 Total days the form has been open.
- 6 Estimated form completion date.
- 7 All steps and their responsible parties.

For each step you will see the step name, start date, responsible parties, and their roles.

Responsible parties have colored bars according to their sign-off status for each step:

Color	Description
Green	Complete
Yellow	Pending
Red	Overdue
Grey	Step not started

You can select different users to be responsible parties, depending on how a step is set up. The ability to select different responsible parties allows for updating users who no longer participate in the project, their roles have changed, etc.

6.4.2.12 Assign user groups

At the project level, you can give user groups permission to view events or tasks. User groups must first be set up for the project. For information on setting up User Groups, see <u>User Groups</u>.

6.4 Step by Step 15 — Assign user groups to an event or task

1. Open the event or task, and then click the User groups icon in the upper-right of the page.

	s	ECTIONS 4		questions 9	answered	EXCEPTIONS
怒		(i)	U	lser groups		×
				TW InEight		
				Quality tour vie	wers	
				Inspection view	vers	

- 2. In the **User groups** side panel, select the groups you want to give permission to.
- 3. Click Save.

6.5 EVENT AND TASK VIEWS

You can filter, sort, and arrange columns in the Events and Tasks pages. The updated view can be saved for quick access. Views can also be sent to other users to view outside the current organization and

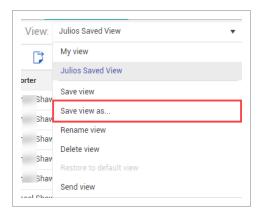

project. In the module landing page, you can access the All events or All tasks pages links, under Links in the upper left of the page.

6.5.1 Save views

After you filter, sort, or arrange your view, you can save the updated view to easily access it in the View list.

6.5 Step by Step 1 — Save your view

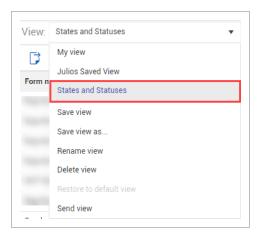

1. Click the My view drop-down, and then select Save view as....

2. In the **Save view as** dialog box, enter the view name, and then click **Save**.

Save view as		
States and Statuses		
	Cancel	Save

You can access the saved view in the My view list.

When a saved view is created, it is also available under Links at the top left of the

module landing page.

Links All events All tasks All components
All tasks
All components
Julios Saved View
States and Statuses

6.5.2 Send a view

You can send your saved view to others. When you send a view, you are sending the organization, project, and applied filters defined by the view, not the exact same forms and tasks that you can see.

What receiving users see depends on their permissions. If they do not have permission to view forms or tasks within the parameters, they cannot see them.

6.5 Step by Step 2 — Send view to another user

- 1. Click the **My view** drop-down menu, and then select your saved view.
- 2. Click the My view drop-down, and then select Send view.

COMPLIANCE MOBILE

InEight Inc. | Release 23.10

7.1 COMPLIANCE MOBILE NAVIGATION

The Compliance application allows users to incorporate technology when completing inspections and tasks instead of a traditional method of using a paper form.

You can perform inspections or complete tasks using the Compliance mobile application on an iOS device by utilizing the forms, questionnaires and tasks created within Compliance web application. You can complete the relevant inspection task or form, online or offline, and synchronize the results when connected to an applicable network.

2:57 PM Thu Aug 20	Menu		≈ 86% ■)
	Complian Venide 20 4 0 20 87 12	ice	
🕥 Sync Status			>
Settings			>
Submission History			>
Kiosk Mode			>
Sign Out			
	To ballet 4	tifications	Man
Se Projects	To-Do List	tifications	Menu

You can easily locate the relevant Tasks or Forms based on your project assignment. You access the Compliance application using your iPhone or iPad device. When you first log in, you will open up to the Projects home page. At the Projects home page, you can select any project that you are assigned to. On the top of the screen you will see two buttons; Recent and All. When these buttons are selected you will either view all of the projects available or projects which were recently opened. This screen also gives you the option of searching for a project.

The mobile app saves your password for quicker log-in.

TIP

			🖬 🛛 Verizon 🗢	3:10 РМ Projects	• 88% • •

			Projects To	-Do List Notif	ications Menu

- NOTE You can have up to 6 recent projects. When you sync it is only the recent projects information that will get updated.
 - TIP You can remove a job from the recent tab by touching and holding it until it shows an X for deletion.

When you select a project tile or list, it opens the modules' screen. All modules listed on your device are given through permissions on the Compliance web application. If you would like to look at the names of the modules as a list, simply touch the icon. This option is available on every page.

📶 Verizon 奈	1:05 PM	100% 🕢
〈 Projects	Modules	\mathcal{C}
		Q 🔳
ے Safety	ට්ථ Compliance	
(Q) Change		
Projects T	Fo-Do List Notifications	Menu

Also, at the top of your screen is the Sync icon. When touched it will sync the latest information from the website if you are in a connected environment.

NOTE

The mobile device does work in an unconnected environment. If you have done a sync to download project information while connected.

At the bottom of the screen are four icons; Projects, To-Do List, Notifications and Menu. When selected these will open other screens on the mobile application which will help you navigate to all

your permission-based projects, give you a list of forms/tasks which still need to be completed and a menu for statuses of syncing and a history of submissions.

TIP If you have been assigned a task it will show up in your **To Do** list under the assigned toggle.

Mobile Application - 4 icons

Name	Description
Projects	Lists and gives access to all the projects for which you have permissions.
To-Do List	Shows the items which need attention.
Notifications	Sends notifications with messages to specific users, roles, projects or organizations.
Menu	Enables you to view the submission history of all the items which you have completed and synced off of that device for a user for the past 30 day.

On the Module landing page, select the **Safety** tile (or list item in list view).

^		=

7.1.1 Kiosk Mode

Kiosk mode limits mobile functionality to filling out and submitting forms or tasks without requiring users to sign in. Kiosk mode is useful if your project has subcontractors who may not be users in your system, but who need to report information.

To start kiosk mode, go to Menu > Kiosk mode, and then turn on the toggle.

If you want to limit kiosk mode to a default project, module, or category, you can set those in Menu > **Settings** when kiosk mode is off. After you set defaults, and then turn on kiosk mode, you can only see forms within the default settings.

TIP You might find it useful to create a category for only the forms and tasks you want to see in kiosk mode. You can then set this special kiosk mode category to be the default.

7.2 FILLING OUT AN EVENT OR TASK - MOBILE

TIP

Mobile tasks have all the same abilities as using tasks on the web with the added ease and efficiency of offline use.

When filling out a form or task, the top of the page shows the following information:

- Sections The number of sections. Tap this number to open a slide-out panel of sections that you can navigate to without scrolling.
- Questions The total number of questions.
- Answered The number of questions answered.
- Exceptions The number of answers flagged as exceptions. Tap this number to open a slide-out panel of questions answered with exceptions. You can go to those questions by tapping them in the panel.

08:28 � → 축 ■					
С	Cancel Exceptions Template Exam Save				
	Sections <u>1</u>	Questions 4	Answered O	Exceptions 0)
Ger	General Information				

Next to the header numbers is the Information icon. When you tap this icon, a slide-out panel opens that provides more information about this event, which functions the same way with a task.

In the below example, there are four questions on this event, three of which are answered.

Can	Accident Form	×

7.2.2.2 Choice

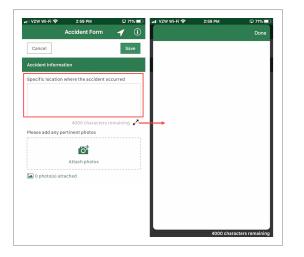

This is used for options like yes/no, pass/fail, accept/reject. These questions are a radio button or icon.

7.2.2.3 Text

Areas in the event or task that capture free text in short (250 characters) or long form (4,000). For example, this can be used for descriptions, short descriptions, explanations, names of subcontractors, and locations.

There are also large text fields. In this example, it's the **Description of the incident**. Clicking on the double arrows expands the box for you to continue typing or use the microphone to dictate.

TIP On free text fields, the mobile application opens a full page for efficiency.

7.2.2.4 People Picker

A people picker is available to use to select those users that have access to the module at the organization level in which the event or task is being performed against.

To access the names, begin typing the name or select the **People Picker** icon. Depending on how the administrator sets up the question, you can select multiple users or none, and the list of users can include either only users with Compliance roles or all users in the project.

A new page is shown with the names of users. Select the name and it appears in the indicated field on the event or task.

Depending on how the question is set up, the selected user can receive an email notification.

7.2.2.5 Attach Photos

The Compliance mobile application lets you to take photographs and annotate on the areas of focus while filling out the event or task. In the application, select **Attach photos**. It opens a page from which you can select an option from the Photo Library or Take Photo with your smart phone.

For example, you might attach reconstruction photos of safety incidents, photo proof of a fix to a nonconformance, or a picture of a certification of compliance.

7.2.2.7 GPS

A GPS question lets you provide your location by tapping **GPS** or by entering your coordinates directly in the fields. You can also tap **Clear GPS** to remove the information if you need to enter a different location.

To use the GPS button on your mobile device, you must allow the Compliance app to access your location when prompted.

If you enter GPS coordinates automatically, you cannot manually edit the coordinates.

7.2.3 Complete a Form or Task

For more information on how to save and submit a form or task, see Complete a Form or Task.

The following steps walk you through performing an event on a mobile device.

7.2 Step by Step 1 — Fill Out an Event - Mobile

- 1. Open the Compliance mobile application by tapping the **InEight SQC** icon on your mobile device. and log in.
- 2. Log in and select Compliance if selection is shown (You may be directly taken to the Compliance projects screen).
- 3. The Projects screen is shown.

The mobile application saves your password for quicker log-in.

4. Open a project for which there is a report.

If your access allows, select the project 105091 – Steel Structure Job

7.3 COMPLETE A FORM OR TASK ON MOBILE

There are several ways to finish filling out a form or task depending on how it is set up by your administrator and what the next steps are.

7.3.1 Save a form or task

If you do not have enough time to complete a form or task, or not all information about the event is readily available, you can tap **Save** to save your work. You can then continue or close the form or task, and then come back later to complete and submit it.

	Safety Task	1 (i)
Cancel		Save
SAFETY TASK INFORMATION		

7.3.2 Assign a task

As part of filling out a task, you might have to assign it to someone else to complete some of it. To assign a task, tap the **Assign** button. If you want to start a new task immediately after assigning the current task, tap **Assign and start new task**.

7.3.3 Submit a form or task

After you have completed your event or task, tap the button to submit it. In this example, the button is labeled **Submit form**. This syncs with the Compliance web application for manager approval.

Click here to s	tart a workers comp cla	im report

If you have not completed your event or task, you can tap **Save**, and it goes to the to-do list, where you can retrieve it when you are ready to complete it.

TIP

NOTE After you sync the event or task to the web, it is removed from your device.

For the event used in this example to be completed, open it in the Compliance web application under Safety > **Events**. In this example, the status for your event is **With Claims Manager**.

())	S100000 - PKS	Inc		-	Compliance	•						¢ Ø
Sa	ifety > Events							V	iew:	All		Ψ
\otimes									1	i	Q	Clear all filters
	Event ID I		Project/Organizatio 🚽	Category		Form name	Event title	Reporter		Event date		Status 📃 [
	2019101100005		S100000 - PKS Inc	Incident		Accident Form	Accident Form_20191	Karen Loftus		10/16/2019		With Claims Mana

The manager can now sign off on the event in the web application. Click the event title to open the event to the closure of investigation section. This is where the manager signs and taps on the Close and complete this incident button to complete the form.

The following steps walk you through performing an event on a mobile device.

7.4 LOCKED EVENTS AND TASKS

When working through a task or event on a mobile device, a locking mechanism is in place to ensure your completion of the task or event. This means another individual cannot open your task or event as long they are synced to the mobile device and the list shows the item as locked.

	> Events - Vie							View:	W: My view			•			
Ŧ	\otimes											3	(i)	Q	Clear all filters

7.4.0.1 Unlock

If you prefer to complete a task on the web rather than on mobile, you can delete the task from your To-Do List.

To delete a task, go to To-Do List > **Assigned**. Swipe to the left on the task, and then tap the trash can icon that is shown to the right.

🗲 To-Do List	RootOrg1 (S100000 - PKS Inc)	\mathcal{Z}
	Saved Assigned	↓† Q
Safety ABC 123 - Co	rporate Safety Forms	\checkmark
Repair Crane 10/15/2021	€	Ē

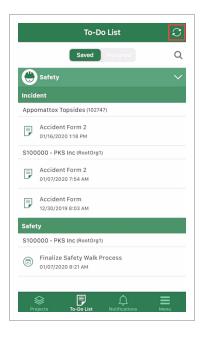

NOTE When you remove a task from the To-Do List, you must be connected to the internet via Wi-Fi or cellular. If you remove when not connected, the task is removed but not unlocked on the web. In this case, you must resync when connected, and then remove again.

After you remove a task from the To-Do List, it is recommended that you not sync your device until the assigned task's status is changed from Scheduled to Pending in the web application. To update the status, you can start the task on the web or, if you have permission to edit properties, you can bulk update unlocked tasks.

NOTE If the task status remains Scheduled the next time you sync, the task is locked and downloaded to your device.

7.5 SYNC

Syncing automatically occurs when you are connected and use a button within the event/task. The **Sync** icon in the top right corner is used when you want to get more data from the Compliance web application to your device.

7.5.1 Sync Settings

Sync settings are located in the Menu > Settings.

7.5.1.1 Active Sync

If you enable Active Sync, data is synced when you open the application or a project. If Active Sync is off, the application waits 24 hours after each project sync before attempting to sync again. You can

manually sync at any time.

7.5.1.2 Sync in Advance

As events and tasks are assigned, they need to be available on mobile device days ahead of the due date so that they can be done on-time.

Sync In Advance lets you choose whether to sync items from the web to your mobile device one, two, or three weeks in the future from the current date to the due date or scheduled date.

7.5.1.3 Sync Over Wi-Fi or Cellular

In Settings > **Sync Over**, you can choose whether to allow syncing only over Wi-Fi or over Wi-Fi and cellular.

7.5.1.4 Sync Profile

The Sync Profile settings lets you choose whether to automatically download assigned events or tasks to your mobile device.

To enable automatic syncing, go to Settings > **Sync Profile**, and then turn on the toggles for events or tasks.

NOTE The sync profile settings are off by default.

If a sync toggle is off and you sync your device, work items are not downloaded to your device.

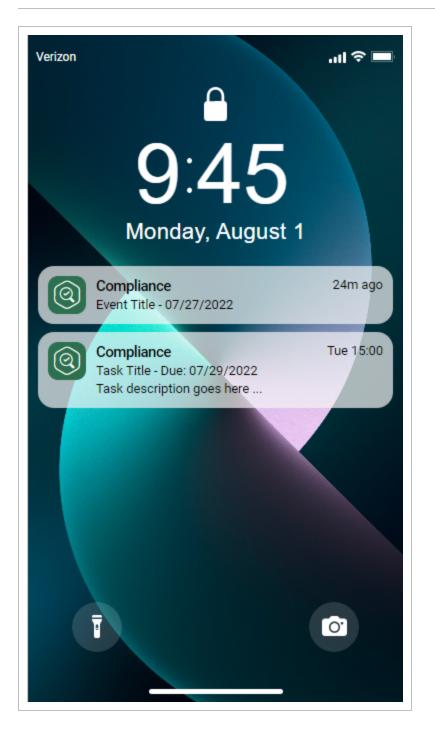

If you have assigned work items on your device and turn off one of the sync toggles, you are asked to confirm whether you want to remove the work items from your assignments and unlock them on the web.

7.6 PUSH NOTIFICATIONS

You can setup push notifications on your iOS mobile device to alert you of any updates of assigned events and tasks. Use the iOS notification settings to control notification alerts.

When an assigned item is set up, you receive a notification on your mobile device.

You can tap on the notification to launch the application automatically. If you are logged in, it takes you directly to the item in the To do list. You must be logged into the application to receive notifications.
