21.7.3 Release Notes

NOTE:

These release notes include notable fixes or updates in the stated products. If no notes are shown for a product, there are no notable changes for that product.

Contract

- The Master Payment Agreement payment term and incoterms values are now populated in the associated contract.
- Data is restored from backup if the original data became undefined.
- The standard ISO time format is now used to convert dates and times in Accruals/Receipts.
- Functions attached to columns are now saved or restored when making changes to line items after VCO execution. You can also change only the column order and column width from local storage.
- The search function in the Contracts list is now working.

Report

- The Employee Hours Summary report has been updated to show date format changes.
- A timeout error has been fixed when running Weekly Payroll Recap report.
- The Client Sign Off report now sends emails as expected.
- A filter has been added to the Design Activity report to fix the timeout error.
- [Explore].[vwDesignScheduleIdDisplayCompare] now shows active values correctly.
