Checklist.....5

 Checklist signature field.....5

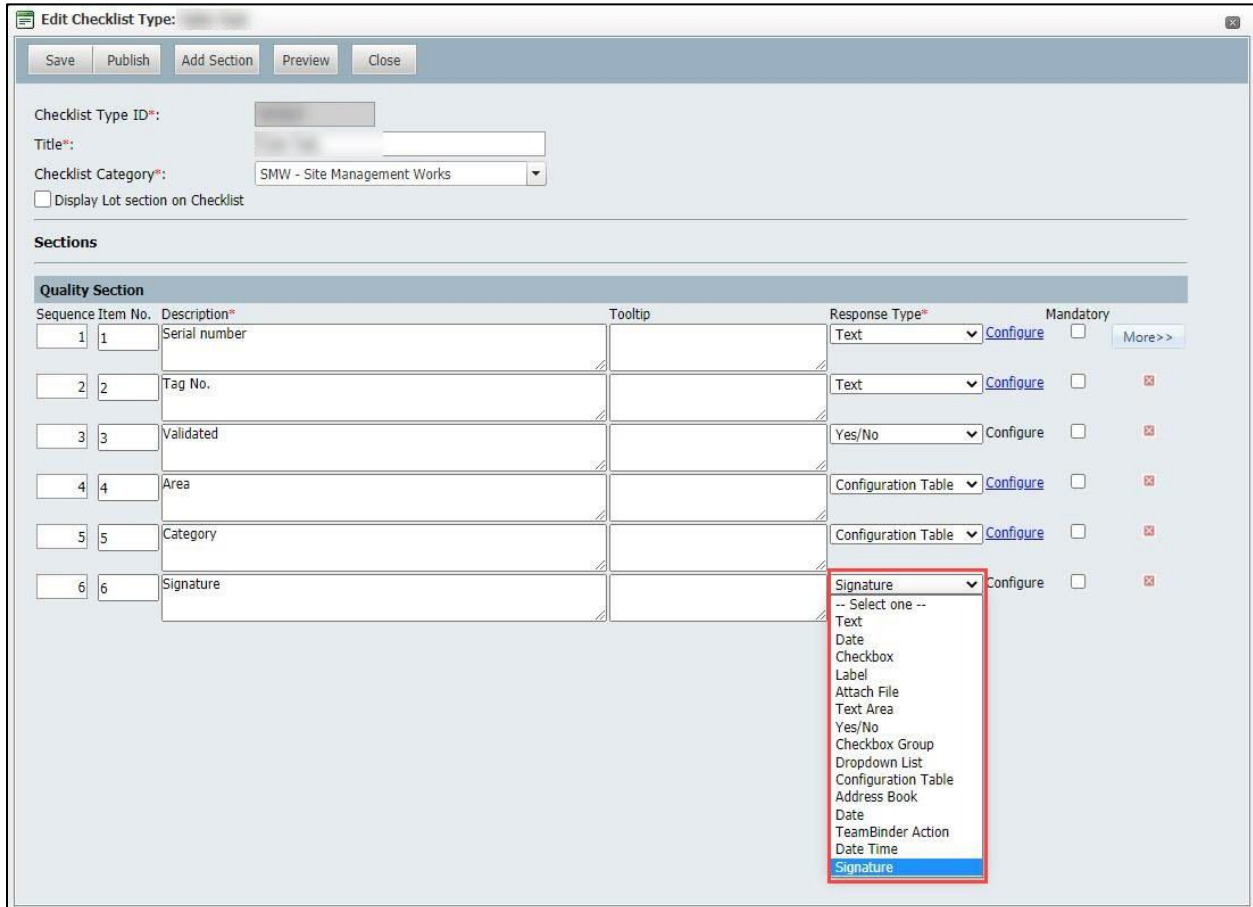

What's new in Document 20.7

- **Forms:**
 - **Custom fields available in distribution** – Custom fields can now be included when configuring automated rules that drive the distribution group. Previously, only the three standard fields (Discipline, Area, and Location) were available.
- **Checklist:**
 - **Checklist signature field** – A new signature control field allows signatures on the mobile app. This feature helps you meet the demand for signatures for project checklists. [Read more](#).
- **Getting Started:**
 - **Okta and PingID support** – Single sign-on is now supported for organizations using Okta and PingID applications. Contact your InEight representative for more information and setup.

Checklist

Checklist signature field

To use the Signature option, go to More > **Manage Checklist Type**, then double-click a Checklist Type ID. In the Edit Checklist Type dialog box, the Signature option has been added to the Response Type drop-down list.
