What's new in Document 22.8

- Address book
 - Global address book status You can now verify the global address book status of a contact or company in the address book, and then relink it. Sometimes updating an entry in the Address book in a project can break the global address book link. Now, if the contact or company link is broken in the global address book, you can fix it. Read more

Address book

Global address book status

The Global address status column has been added to the Address book register for contacts and companies, that lets you quickly see if the entry is linked from the global address book.
