What's new in Document 23.4

- **Lots**
 - **Update lot access in bulk** – You can now update the security for multiple lots in bulk. When managing a lot type and you add a new user to a lot type, Document now lets you update the access to all lots of that type. [Read more](#)

Lots

Update lot access in bulk

When you add a user to a lot type (More > **Manage lot types**) and then click **Save**, Document now asks if you want to update lot security for already created lots. If you click **Yes**, the user is given access to all existing and new lots of that type. If you click **No**, the user is given access to only new lots created of that lot type.
