What's new in Document 22.2

• Documents

- **Vendor data filters** You can now filter the Documents register and holding area based on the metadata of a linked deliverable or purchased item. <u>Read more</u>
- Filter based on link type You can now filter documents based on a linked item type. <u>Read more</u>
- Download file prior to consolidation Some projects require the ability to download or export each document that contains all review comments and markups made during the review workflow but prior to the consolidation of the markups and comments and subsequent release of the document. <u>Read more</u>
- Download file with annotations When you download a document, you now have the option to download with or without markups. This option is available when you download a single document. <u>Read more</u>
- Change private comments to public Review coordinators and administrators can now change private comments to public after the document has been released. Previously, you had to choose which comments to publish with the document but would then have to open a ticket with InEight to change unpublished private comments to public. <u>Read more</u>
- Download documents in bulk from the Document Review page You can now download multiple documents from the Document Review page. Previously you had to download documents one at a time. <u>Read more</u>
- Apply review statuses in bulk during release Review coordinators can now apply review statuses in bulk when releasing documents. Previously, the review coordinator had to apply each review status individually. <u>Read more</u>
- Viewer
 - Edit text in a text box annotation You can now edit text that you entered in the text box markup, so you can fix errors in annotations. Previously, if you made a mistake, you would have to delete the markup and add a new one.
- Submittals
 - **Group items on Submittals register** You can now group the Submittals register by available register columns to help you quickly locate submittals. <u>Read more</u>
 - Delete or cancel submittals You can now cancel in-progress submittals and delete draft submittals from the register. <u>Read more</u>
 - Issue submittals in bulk You can now select multiple submittals from the register to issue in bulk. The issued-to company can also be assigned or defined in bulk. <u>Read</u> <u>more</u>
- Packages

- Decline Addendum notification You can now omit documents from the addendum and remove the current indicator in the register. You can use this feature when new revisions to a document in a package does not require an update to the package or an addendum notification. <u>Read more</u>
- Define filter to set flag You can now define a filter condition for linked items by user or company. If an item meets the condition, a flag is added to the package register entry. A new Flag column has been added to the Sent items and Draft registers. <u>Read more</u>
- Vendor data
 - Link deliverable line items You can now link deliverable items from the document instead of having to link from the deliverable items. When you add a document in the Vendor data holding area, you now link to the deliverable from the holding area document.
- Registers
 - **Clear all filters option add to all registers** You can now clear all filters on a register with a single action instead of clearing each filter individually. <u>Read more</u>

Documents

Vendor data filters

Although the metadata fields do not show in the Documents register you can enter them in the filter criteria.

The Module column has been added to the filters. Values for the module are Document, Purchased items, and Deliverable items. When you select Deliverable items or Purchased items as the module, the Column values update to the fields for the item. You can then enter a value representing the deliverable or purchased item. When you click **Apply**, all the items for the deliverable or purchased item are shown.

Filter based on link type

Link type has been added to the Column field in the document filters to let you enter link types, such as Mail, so you can filter on it.

Download file prior to consolidation

To download with the review annotations from document details, expand the **Actions** menu, and then select **Download pdf files with private and public markups**.

Actions	•	æ		🕑 Check out	Change
Undo					
Downl	oad po	lf files wi	th private a	nd public markups	

The PDF and FDF files are provided in a zip file. Follow these steps to download the markups:

- 1. Extract the zip file.
- 2. Open the FDF file.
- 3. When prompted to select a file to merge with, select the PDF file in the zipped file.

Document markups are then merged into the original PDF.

Note: This option is available in the PDF viewer only and is only supported with Adobe.

Download file with annotations

When you download an individual document from the register, you now have the option to download with or without markups. The ability to select this option in bulk downloads will be addressed in a future release.

To download a single document without markups from the register, click the **Download view files** icon in the PDF column, and then select **Download with Annotations**.

Documents

The PDF and FDF files are provided in a zip file. Follow these steps to download the markups:

- 1. Extract the zip file.
- 2. Open the FDF file.
- 3. When prompted to select a file to merge with, select the PDF file in the zipped file.

Document markups are then merged into the original PDF.

Note: This option is available in the PDF viewer only and is only supported with Adobe.

To download multiple files without markups, select the documents in the register, and then click **Download**.

Change private comments to public

If you mistakenly chose to not publish a comment, you can now mark the unpublished private comments as public.

When you are on the Comments tab, you can expand the **Actions** menu, and then click **View private comments** to see a list of all comments that have not been published.

Apply review statuses in bulk during release

When you want to approve multiple documents, you can now select them from the Document > **Release** page, and then click Actions > **Apply review status**. The Apply review status dialog box opens, and then you can select the status. You can apply the status to the selected documents only or to all documents in the view.

elect one	•

Apply to selected doc Apply to all listed doc	uments only uments
Apply to selected doc Apply to all listed doc	uments only uments
Apply to selected doc Apply to all listed doc	uments only uments
Apply to selected doc Apply to all listed doc	uments only uments

Click **Save** to apply the status.

Submittals

Group items on Submittals register

A grouping tool has been added to the Submittals register. The tool, which is shown as a gray bar above the column headings, lets you drag and drop a column heading to group by that column. For example, if you drag the Status column to the bar, the submittals are grouped by status. In the image below, the submittals are grouped by status in ascending order. The submittals with no status come first, followed those with 25% complete and then those with 50% complete.

You can click the arrow next to the column name in the tool to change the order from ascending to descending. You can expand and collapse the groupings, so you can find the submittal you are looking for quickly.

To use multiple groups, you can drag multiple column headings to the grouping tool. The submittals are grouped in the order the headings are placed in the tool. For example, if you were to add the Date created column to the scenario above, the submittals would be grouped by status and then creation date within the status.

Delete or cancel submittals

If you have mistakenly issued a submittal, you can now cancel it. When you cancel the submittal, the record is locked, and you cannot edit information or upload deliverables. To Cancel an issued submittal, select the submittal in the register and then expand the **Actions** menu and select **Cancel**.

When you cancel a submittal, you are prompted to specify whether the issued-to company is notified that the submittal has been canceled.

By default, the canceled submittal is omitted from the register. A filter condition, Show canceled submittal, has been added so you can show canceled submissions in the register.

You can also delete draft submittals. To delete a draft, select a submittal that is in draft status, and then expand the **Actions** menu and select **Delete**. The submittal is deleted from the register.

Issue submittals in bulk

To issue multiple submittals, select one or more submittals from the Submittals register, and then click **Issue submittals**.

Packages

Decline addendum notification

The Ignore check box has been added to the Add documents dialog box. When you add revised documents to a package, you can select the Ignore check box when you want to ignore a revision. You can also specify whether to ignore the current revision only or all future revisions. When selected, the addendums are not sent, but the Addendum column of the register is updated, and the icon is no longer shown.

Packages

Add d	ocument)

Define filter to set flag

You can define alert flags from your Sent Items register from the Actions menu (Actions > Admin > **Define alert flags**).

Х Define filter Forms • Search criteria for: Show: Personal All forms O Awaiting action/review -Show cancelled forms Column Filter by: Operator Value \oplus Form Status Equals 01 - AM COM ... \otimes --01 - AM COMME. (\pm) AND Select one... \otimes Select one... --02 - DT COMMEN ... 03 - PE REVIEW -... 04 - PV REVIEW -... Reset criteria Save 05 - RMS REVIE ...

You can then define a condition. If any of the documents or items linked to the documents in the package in the register meet the condition, a flag is added to the register. For example, you can set a condition for a form. If a document has a linked form that happened after the package is created, a flag is added to the register. You can then click on the flag to display the items that triggered the flag.

N.	•	Z	Туре	Package ID	Title		
			-				
		IN	Tender <u>127-0001</u>		7202121-001		
			Standard	<u>MK-666</u>	МК-666		

You can clear the flag by clicking **Clear alert flag**.
