Introduction

This document provides information and general considerations for system requirements and software compatibility to use InEight Estimate on Premise.

DISCLAIMER:

This document is subject to change at any time. This document only covers software directly compatible with Estimate on Premise. InEight does not assume the responsibility to verify or guarantee whether any third-party software is compatible with any other third-party software.

System requirements

The following tables provide the recommended system requirements to access and use Estimate on Premise.

Estimate uses specific versions of SQL, Windows, and other third-party software, such as Microsoft Excel for basic functionality. To install the latest version of Estimate, confirm that the recommended requirements needed to run Estimate are installed on your machine.

Application (Estimate Server)	
CPU	Quad-Core Processor w/ 3.0 GHz (x86/x64)
Storage	100 GB hard-disk space ¹
Memory	8 GB RAM ¹
Display	1920x1080 32-Bit Color
Software	Windows 2019-2025 Server with latest service pack .NET Framework 4.7 or 4.8

Workstation (Estimate Client)	
CPU	Quad-Core Processor w/ 3.0 GHz (x86/x64)
Storage	50 GB hard-disk space ¹
Memory	16 GB RAM ¹
Display	1920x1080 32-Bit Color
Internet/ Network	Internet connection required for web-based modules and/or synchronization
Software	Windows 11 Professional or Enterprise (32-bit and 64-bit) .NET Framework 4.7 or 4.8

Database (SQL Server)	
CPU	Dual-Core Processor w/ 2.0 GHz (x86/x64)
Storage	250 GB hard-disk space ¹
Memory	8 GB RAM ¹
Display	1024x768 32-Bit Color
Software	Windows 2019-2025 Server with latest service pack and SQL Server 2019-2025 Standard, Enterprise, or Express

¹ – Additional RAM, and/or hard disk space might be required based on load and amount of data.

NOTE: Estimate on Premise does not support IA64 operating systems.

Software compatibility

This information only covers software directly compatible with InEight Estimate on Premise. InEight does not assume the responsibility to verify or guarantee whether any third-party software is compatible with any other third-party software (e.g., MS SQL Server 2014 compatibility with Windows Server 2022). This document is subject to change at any time.

NOTE: Any software that is not listed is explicitly not supported.

Qualified = Supported: You can get support for both Qualified and Compatible platforms from InEight.

Qualified platform ✓: The platforms listed in the qualified category have been systematically tested by InEight as part of the release covered by the InEight Estimate Compatibility document.

Compatible platform +: The platforms listed in the compatible category have not been systematically tested by InEight, in this release, but based on testing in previous releases, and knowledge of the platform, InEight expects that the functionality will work and will fully support these platforms.

Unsupported ✗: The platform listed is not supported.
