Overview

The Completions Template API is intended to give users Status, version, and other information about templates created in Completions.

Relationships and Dependencies

From: Table	To: Table	Relationship	Cardinality[1]	Comment
SelfService_ Completion_ TemplateData (TD)	SelfService_Completion_GeneralHeaderData (GHD)	TD. InspectActivityTypeId = GHD. InspectActivityTypeId	1:M	
SelfService_ Completion_ TemplateData (TD)	SelfService_Completion_EventTaskData (ETD)	ETD. InspectActivityTypeId = GHD. InspectActivityTypeId	1:M	

API Detail

Direction		From Project Suite
Pagination		50,000 Rows
Frequency		All Reporting APIs are used by calling a GET method at an interval determined by the customer. InEight suggests using these APIs on an infrequent basis (once per day) to avoid potential performance impact to live systems when the returned data set could be large.
Trigger Method(s)		All default OData filters are supported
Average Payload Size		Depends on date range selected
APIM Name		SelfService_Completion_TemplateData
Replicate View		[SelfService].[vwCompletionsTemplateData]
Data Refresh/Delta/Incremental Loads		The data in this API will refresh in twenty minutes or less from the time it is entered.
Project Suite	**Starting Version**	23.2
	Ending Version	N/A

Supported Filters

All default OData filters are supported by this API.

[1] *1:M = One to Many, 1:1 = One to One, M:1 = Many to one*
