Overview

The Compliance Current Event Task Data API is intended to represent an instance of a filled-out response, meaning that the data is at a question/answer level. When creating reports utilizing this data, please note that to link to your attachments you will need to create the link using the instructions below.

Creating the link to form attachments in your report, you will need to create a new field/column with the following logic:

When Characteristictype = image, signature, or attachment

Then hardcode https://ineightsuite-qa-2411.hds.ineight.com/CoreWebServices/Documents/ The highlighted portion should come from your environment link, as demonstrated below

ineightsuite-qa-2411.hds.ineight.com/AppCore/UserLandingView

Concatenate the filtered Response field at the end of the hard-coded string, and this will be the final piece of your link. Example below, the highlighted portion at the end is the identification number associated to a given image. It is the response to questions where an image, or a signature of an image is attached.

*In order to access the attachment, you **must** be logged into the application in a browser tab.

Relationships and Dependencies

From: Table	To: Table	Relationship	Cardinality[1]	Comment
SelfService_ Compliance_ EventTaskData (ETD)	SelfService_Compliance_TemplateData (TD)	ETD.InspectActivityTypeId= TD.InspectActivityTypeId	M:1	
SelfService_ Compliance_ EventTaskData (ETD)	SelfService_Compliance_GeneralHeaderData (GHD)	ETD.InspectActivityId= GHD.InspectActivityId	M:1

API Detail

Direction		From Project Suite
Pagination		50,000 Rows
Frequency		All Reporting APIs are used by calling a GET method at an interval determined by the customer. InEight suggests using these APIs on an infrequent basis (once per day) to avoid potential performance impact to live systems when the returned data set could be large.
Trigger Method(s)		All default OData filters are supported
Average Payload Size		Depends on date range selected
APIM Name		SelfService_Compliance_EventTaskData
Replicate View		[SelfService].[vwComplianceEventTaskData]
Data Refresh/Delta/Incremental Loads		The data in this API will refresh in twenty minutes or less from the time it is entered.
Project Suite	**Starting Version**	23.2
	Ending Version	N/A

Supported Filters

All default OData filters are supported by this API.

Field Descriptions

Name	Description	Example
InspectActivityResponseId	Unique identifier associated to each response	174
InspectActivityId	Unique identifier that corresponds to each record in the API, refers to the	8

InspectActivityTypeId	Unique identifier linking the record to the activity type	Procurement
DisplayId	Unique identifier for each instance of a filled out form or task, displayed in the application	Procurement group
InspectActivitySectionId	Unique value associated to the section of the form or task	8
InspectActivityTypeSectionId	Unique value associated to the section of the activity type	8
InspectCharacteristicTypeId	Unique value associated to the characteristic type	55
FormName	Text name of the form	Injury Form
SectionName	Text name of the section(s) within a form	Issue Identification
QuestionName	Text name of question	Injury Question
InspectQuestionId	Unique identifier assigned to each question by the system	8923
QuestionText	Text a question consists of	Were you hurt
RawResponse	Text of question response directly from the table without any modifications	Yes
Response	Text of question response	Yes
CharacteristicType	Indicates the characteristic of the response to the question	List
Depth	Depth of the Response Type Element	1
ResponseElementId	Allows you to filter on this to see all questions that have the same response, will remain the same if the text changes	231591
ResponseTypeElementId	UniqueIdentifier for the ResponseTypeElement	2680550
IsException	Exception Flag	No Exception
ResponseTypeDisplayType	ResponseTypeDisplayType	11
IsLabel	Indicates if response is a label	0 = False; 1 = True
SectionPosition	Identifier of the position of the response in a form	1
RepeatingSectionPosition	Section position when the section is repeating	1
ReportingSectionIteration	Section position when the section is iterating	0
RowPosition	Identifier of the row of the response	2
ColumnPosition	Identifier of the column of the response	1
ModifiedDate	Date the record was modified	2019-01-10 11:26:41.2433 333 +00:00
ModifiedDateChar	Date the record was modified, this field captures distance from UTC	2019-02-26 06:28:56.000000 +00:00
IsActive	Indicator if the record is active	True

QuestionIntegrationTag	Tag assigned to questions in Compliance to map to standard reports in Report	FPAnchor
QuestionGroupId	Unique identifier that groups questions per template	196307
TemplateGroupId	Unique identifier for events created from the same template	6396
Source	Response or Scheduled data	Response
