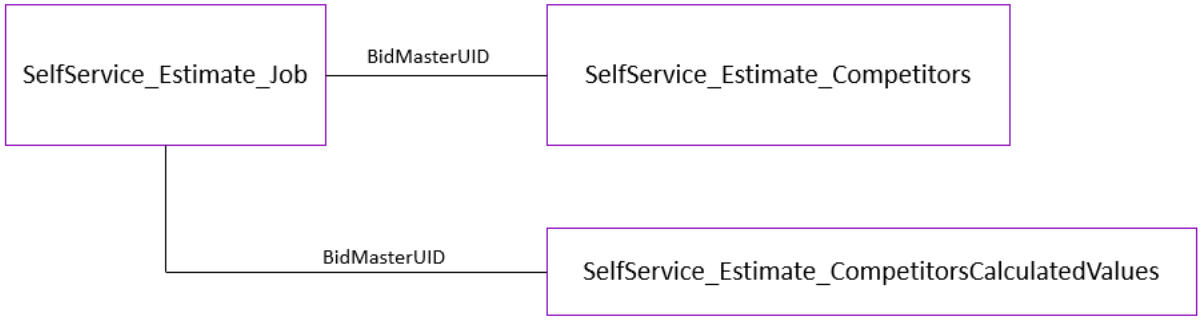
Overview

The ***SelfService_Estimate_CompetitorsCalculatedValues*** API provides the calculated values for the Competitors table, which lists the competitive bidders for an estimate as found in the Competitors register in the Estimate application. The Competitors register also includes a Bid Tabulation pane where users can enter individual prices for Pay Items. The Calculated Bid amount is derived from the detailed unit rates multiplied by the items pay quantities and the Total Submitted Bid Amount for a bidder can be entered to see if there is a difference between a bidders submitted bid and the calculated bid amount based on their unit rates.

Relationships and Dependencies

From: Table	To: Table	Relationship	Cardinality[1]	Comment
CompetitorsCalculatedValues (CCV)	Job (J)	CCV.BidMasterJobUID = J.BidMasterJobUID	M:1	
CompetitorsCalculatedValues (CCV)	Competitors (C)	CCV.UID = C.UID	1:1	



[1] *1:M = One to Many, 1:1 = One to One, M:1 = Many to one*

API Detail

Direction		From Project Suite
Pagination		50,000 Rows
Frequency		All Reporting APIs are used by calling a GET method at an interval determined by the customer. InEight suggests using these APIs on an infrequent basis (once per day) to avoid potential performance impact to live systems when the returned data set could be large.
Trigger Method(s)		All default OData filters are supported
Average Payload Size		Depends on date range selected
APIM Name		SelfService_Estimate_CompetitorsCalculatedValues
Replicate View		[SelfService].[vwEstimateCompetitorsCalculatedValues]
Data Refresh/Delta/Incremental Loads		The refresh of the data in this API is sync-based. The time it takes data to appear in this API is dependent on the load on the server at the time. If it takes more than 15 minutes, please submit a ticket with the Service Desk.
Project Suite	**Starting Version**	24.3
	Ending Version	N/A

Supported Filters

All default OData filters are supported by this API.
