Overview

The ***SelfService_Estimate_Jobs*** API is one of multiple APIs comprising the data contained in the Estimate Job entity.

The Estimate Job entity mainly includes three tables, *SelfService_Estimate_Jobs*, *SelfService_Estimate_JobsCalculatedValues* and *SelfService_Estimate_JobsReferencedData*.

The *SelfService_Estimate_Jobs* table contains Job records as created and managed by the Estimate application.

The *SelfService_Estimate_JobsCalculatedValues* table contains data commonly calculated in some way for display in the application and can provide a convenient way to reference data as it appears in the application without needing to transform it for display purposes.

The *SelfService_Estimate_JobsReferencedData* contains the values of the many foreign key lookup values stored in the jobs table and can provide a convenient way to reference data as it appears in the application without needing to lookup the foreign key values from a lookup table.

Monetary values stored in the database are stored in their base currency and corresponding values displayed in the application have been modified based on the conversion factor of the items assigned currency.

Quantity values stored in the database are stored in their base measurement units and corresponding values displayed in the application are potentially modified based on the conversation factor of the items unit of measure

API Detail

Direction	From Project Suite
Pagination	50,000 Rows
Frequency	All Reporting APIs are used by calling a GET method at an interval determined by the customer. InEight suggests using these APIs on an infrequent basis (once per day) to avoid potential performance impact to live systems when the returned data set could be large.
Trigger Method(s)	All default OData filters are supported

Average Payload Size		Depends on date range selected
APIM Name		SelfService_Estimate_Job
Replicate View		[SelfService].[vwEstimateJob]
Data Refresh/Delta/Incremental Loads		The refresh of the data in this API is sync-based. The time it takes data to appear in this API is dependent on the load on the server at the time. If it takes more than 15 minutes, please submit a ticket with the Service Desk.
Project Suite	**Starting Version**	21.5
	Ending Version	N/A

Supported Filters

All default OData filters are supported by this API.
