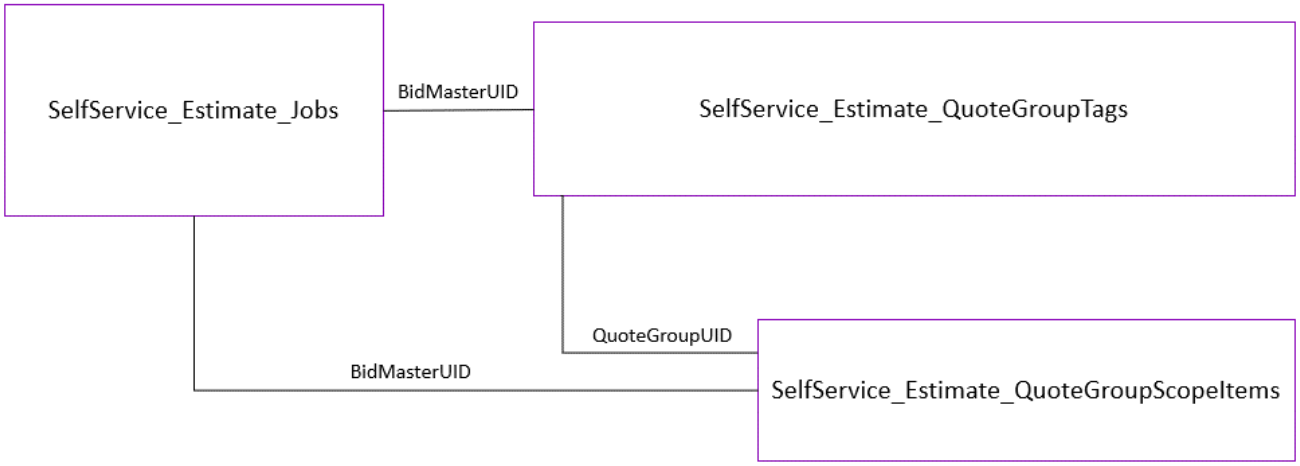
Overview

The ***SelfService_Estimate_QuoteGroupScopeItems*** API provides the list of Scope Items for each Quote Group in an Estimate. Quote Group Scope Items are established for each quote group, and can be used to help understand if a vendor has qualified their quote, and if any adjustments should be made to the quote based on such inclusions and exclusions. Such qualifications can be indicated on the Quote when it is entered and the scope items can be displayed in Quote compare & Award to help in making a meaningful comparison among vendor quotes in any particular quote group.

Relationships and Dependencies

From: Table	To: Table	Relationship	Cardinality[1]	Comment
QuoteGroupScopeItems (QGSI)	Jobs (J)	QGSI.BidMasterJobUID = J.BidMasterJobUID	M:1	
QuoteGroupScopeItems (QGSI)	QuoteGroupTags (QGT)	QGSI.QuoteGroupUID = QGT.UID	M:1	



[1] *1:M = One to Many, 1:1 = One to One, M:1 = Many to one*
