Overview

The ***SelfService_Estimate_QuoteGroupTags*** API provides the list of Quote Group Tags for an Estimate. Quote Group Tags are used to group quotes into similar scopes of work for purposes of comparing quotes. Cost Items or Resources are assigned to a Quote Group tag and when quotes are received from multiple vendors for the same scope of work. The quote group tag identifies groups of Cost Items or Resources as belonging to the same logical collection of quote items for inclusion in a comparison. In the Quote Compare & Award screen, Quote Items that do not belong to a quote group are found in the section labeled "unassigned".

Relationships and Dependencies
