21.3.2 Release Notes

NOTE:

Included are notable fixes or updates in stated products. If no notes are displayed for a product, this means that there are no notable changes.

Change

- In the PCO Log Summary Report, the Current value was not matching from Change. Changes have been made to the save process to resolve.

Contract

- There were some issues with updating closeout approvers. Performance has been enhanced to resolve.

Control

- CE Unit Rate on Labor Estimate Resource entered into Control > Project Library only was showing if \$ rate was entered against Undefined Labor Cost Type. It then saved the rate against Labor Base Cost Type. Subsequent editing of the Resource removed the CE Unit Rate until it was re-entered against Undefined Labor.
- There were duplicate cost items in the TimePhased Forecast Reporting Table which showed the incorrect sum at the cost item level.

Report

- In the Earned Values report, a different manhour value was showing compared to what was shown in Control. A setting was added based on changes in Control to resolve.
- The Trend Chart WBS report displayed Actual manhour values that were not consistent with what Control displayed.
- The Variance report by resource type was failing to run. The Parameter dataset was converted to an ODS table to resolve.
- On the Crew Communicator Summary, Daily Plans were not summarized on one page.
- There was a Georeplica General Header Issue with FormOrTask being inconsistent. The FormOrTask logic was changed and the isactive filter was removed and made explicit to resolve.
