22.10.2.2 Release Notes

NOTE:

These release notes include notable fixes or updates in the stated products. If no notes are shown for a product, there are no notable changes for that product.

Control

- The performance of the application has been improved.
- In Forecast Resources, the remaining quantity's value is now being retained.
- You can now publish cost item changes to other applications successfully and the fixed summary calculations process performance has been improved.
- Change orders can now be approved in the change register after the code was updated.

Report

- The default parameters for the Daily Cost Performance report have been corrected to fix the subscription.
- The fiscal periods are now created correctly based on customer settings.
- The fiscal period date calendar logic has been corrected in the Design Activity report.
- The Advanced Work Packaging dashboard now refreshes correctly after an errant reference to a deprecated table was removed.
- The API view logic for the Time Phased Forecast report has been modified to use IsInRemaining cost and correct the issue.
