21.12.4 Release Notes

NOTE:

These release notes include notable fixes or updates in the stated products. If no notes are shown for a product, there are no notable changes for that product.

Change

- The VCO ID is now auto-generated in the Issue pricing Vendor dialog box when the auto-numbering setting in the InEight Contract project settings is configured.
- You must update to the latest version Google Chrome so that the Cost item pricing slide-out panel shows when magnification is 100%, full screen.
- WBS element 104561.2200 now shows as an available WBS element in Contract.

Contract

- Payment form associated documents are no longer shown in the Supporting documents grid after the payment form is removed.

Control

- The issue with the sync schedule not showing correctly is now fixed.
- The cost item API is no longer hanging in processing status, and no longer considers if the cost item has committed cost when determining if it should be updated.

Progress

- Conflicting package upgrade files have been excluded so the Management console now loads correctly.

Report

- In the Daily Plan Timesheet report, a filter has been added to remove columns if all values from the WBS were 0.
- The SelfService_Plan_TimeCard API has been modified to include the payroll indicator added to the employee reason code.
- A filter has been added to remove duplicate reason code lines in the Daily Plan Timesheet report.
