

The screenshot shows the 'Template integrations' section of the Product Settings. A table lists integration templates. A callout box points to the 'Change_Task Integration Template'.

Integration title	Associated products
<input type="checkbox"/> Change_Task Integration Template	Change

Template Integration lets you make tasks available for use with InEight Change and other products. It also allows you to create an issue from Compliance to Change.

The screenshot shows the 'Module management' section of the Product Settings. A table lists the modules used by the company. A callout box points to the table.

Module name	Description	Secondary module name
Safety	A module to track and manage safety related business processes.	Safety
Quality	A module to track and manage quality related business processes.	Quality
Environmental	A module to track and manage environmental related business processes.	Environmental
Compliance	A module to track and manage compliance related business processes.	Compliance
Custom	A module to track and manage custom related business processes.	Custom
Change	A module to track and manage change related business processes.	Change

Module Management indicates the different module tiles your company is using.
